WEEKLY MONITOR.

A HUNTER'S STORY.

EXPOSURE BROUGHT ON AN AT-TACK OF RHEIMATISM.

-Sleep at Times was Impossible-Health Again Restored.

From the Amherst, N. S., Sentinel The little village of Petitcodiac is situated in the south-easterly part of New Brunswick, on the line of the Intercolonial Railway.

 Mr. Herbert Yeomans, who resides there, follows the occupation of a hunter and trap-per. His occupation requires him to endure a great deal of exposure and hardship, more especially when the snow lies thick and dee on the ground in our cold winters. A few years ago Mr. Yeomans tells our corresponlent that he was seized with a severe bilion attack and a complication of diseases, such as sour stomach, sick headache and rheuma-

version of the fact

nost excruciating pains in my arms, legs will be sufficient. and shoulders, so much so that I could no (11) Spread the gravel evenly over th rest in any position. I frequently could not eleop nights, and when I did I awoke with a tired feeling and very much depressed. road, and keep it raked or scraped into the wheel and horse tracks until consolidated. A road roller should be used for compacting My appetite was very poor, and if I ate any. thing at all, no matter how light the food (12) On all gravel roads, crown the roadwas, it gave me a dull, heavy feeling in my stomach, which would be followed by vom-iting. I suffered so intensely with pains in my arms and shoulders that I could scarcely way by cutting off the sides, putting new material in the centre. Do not cover the old gravel foundation with earth from the side. (13) Make the width of the road as uniaise my hands to my head. I tried diffe form and the grade as easy as possible. (14) Remember that good drainage is abent remedies, but all to no purpose. A neighbor came in one evening and asked "have you tried Dr. Williams' Pink Pills?" solutely necessary. (15) Whenever water stands on the road I had not but then determined to try them, and procured a box, and before the pills way, or by the side of the road, or whenever the ground is seen to remain most, better were all gone, I began to improve. This en couraged me to purchase more and in a few weeks the pains in my shoulders and arms drainage is needed. (16) See that drains are free from obstru were all gone and I was able to get a good tion, that they have a good fall and proper ight's rest. My appetite came back and (17) Surface water should be disposed of the dull, listless feeling left me. I could eat a hearty meal and have no bad after ef-fects and I felt strong and well enough as are hard to handle and are destructive. though I had taken a new lease of life. My Obtain outlets into natural water courses a though I had taken a new lease of life. My old occupation became a pleasure to me and I think nothing of tramping eighteen or twenty miles a day. I know from exper-ience and I fully appreciate the wonderful results of Dr. Williams' Pink Pills as a safe other as possible. (18) Instead of having deep ditches to underdrain the road, use tile. (19) Give culverts a good fall and free outlet, so that water will not freeze in them. results of Dr. Williams' Fink Fills as a sate and sure oure and I would urge all those af-flicted with rheumatism or any other ail-ment, to try Fink Fills as they create new vigor, build up the shattered nervous sys-ufed in the performance of statute labor. tem and make a new being of you. The gennine Pink Pills are sold only in boxes, bearing the full trade mark, "Dr. William Pink Pills for Pale People." Protect your self from imposition by refusing any pill that does not bear the registered trade mark round the box. Instead of Shoulder Braces. COE, CHEERFULLY TELLS THE STORY OF Probably the oldest timber in the world is HER CURE. HER OUR. "I was for years a great sufferer from rheumatic affection in my ankles, and at times was so bad that I could not walk. I tried every known remedy and treated with best physicians for years, but got no perma-nent relief. Although my confidence in remedies was about exhausted, I was in-duced to try South American Rheumatic Gure. I purchased a bottle. The very first does gave me relief, and after taking two bottles all pain had vanished and there has been no return of it. I do cheerfully recom-mend this great remedy." Sold by S. N. Wears. found in the ancient temples of Egypt, in connection with stonework which is known to be at least 4,000 years old. This, the only wood used in the construction of the temple, is in the form of ties, holding the end of one stem to another. -The natives of Gibraltar and also the IT PAYS Moors across the strait have a tradition that somewhere on the rock there exists a cavera whence a subterranean passage leads under the strait to the mountains on the other side. The existence of this passage, they say, is known to the monkeys, who regularly use it in passing from one continent to the other. -Oom Paul, though "rude in speech " is slways impressive. Referring to the effect of the comonstration made by England's fly-ing equadron, President Kruger said, through an interpreter, to a pro-German visitor: "Ask slim what good Germany was in January 1896. The old woman just sneezed and Germany was nowhere to be seen." -Boils, pimples and eruptions, scrofula, salt rheum and all other manifestations of impure blood are cured by Hood's Sarsapar-illa.

The council and read supervisor should e every means to interest pathmasters is The Strawberry Bed. the subject of road improvement, and to keep them interested. An association of township, Strawberries can be grown profita or even county pathmasters, should be formed to meet annually for discussion and for the interchange of ideas, and it should be one of the duties of every pathmaster to attend this convention. The council should see that the pathmasters are provided with printed matter, containing good prac hints on the principles of road-making, and the best means of carrying them into effect. A number of the directions most important

to follow may, as a simple measure, accompany each year's road list. The following i odel set of rules which could be imp on the nathmaster by this means: (1) Carefully plan and lay out the work

before calling out the men. (2) When preparing plans, keep the work of succeeding years in view. (3) Call out for each day only such a num-

Instruction for Path-Master

ber of men and teams as can be properly (4) In laying out the work, estimate on a full day's work from every man, and se that it is performed. (5) See that all the gravel hauled is clean. (6) Every waggon box should hold a quar ter of a cord of gravel. (7) Specify the number of loads to consti-

tute a day's work. (8) Properly grade and crown the road before putting on gravel. (9) A fair crown for gravel roads is one winter and early spring. inch of rise to each foot of width from the

side to the centre. (10) Give the roadway on hills a higher own than on level ground, otherwise wat will follow the wheel tracks. One and one half inches to the foot from side to centre

the skin is very thin, and they also keep well in winter. It is said that a single plant has ways as the polato.

Report of the Ontario Provincial Instructor in Road-Making.

Make the Best of Yourself. Young people should be taught that it is the part of a coward to complain and "get in the blues" over what is inevitable, and

that "pluck" and "courage" are qualites as admirable in every day life as on especial occasions. Every one, to a certain degree may be "self made." A youth may, if he is

most any good rich soil, except where the water would lie and form ice in winter. The plants should be set in rows four feet apart nd lose two. and ten inches apart n the rows. Cultivat between the rows, making the horse and culivator do the business. The most profitable way is to let the plants make a matted row eighteen inches wide, and cut all runne making out between the rows. The presen f weeds is one of the worst things the stru One of the highest mou berry grower has to contend with, and to make the matter worse the plants should not be disturbed during the bearing season. The weeds that are most troublesome when they get a foot-hold are those that grow later in

the season. They are always prolific in seed and hard to kill, and they will occupy the ground at the very time the new plants are forming: Hence the necessity of the most thorough work from the time of setting out the plants in the spring until the ground freezes in the fall. Mulch in the fall after the ground freezes with some material such as coarse salt grass, marsh hay, or straw manure and the less weed seeds there are in this mulching the better for your peace of mind afterwards. This mulching is absolute ly necessary to protect the plants from heaving out with the frost like clover roots, by the thawing and freezing of the ground in

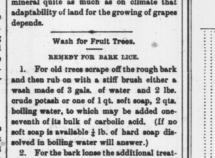

Better than the Potato We are to have, it seems, a substitute for he potato in the Chinese artichoke, recently oduced from Japan. According to th Philadelphia R-cord, it is, "fully equal to

Agricultural.

the potato as food and yields twice as many bushels per acre. It grows to the height of about twelve juches, the tubers being formed like four or five round radishes growing together. The tubers are more nitrogene than the potato; they require no peeling, an

been known to produce 200 tubers and the crop yields 500 bushels per acre." Add to this that the tubers can be cooked in as many Potash to Sweeten Fruit.

A plentiful supply of potash not only in eases fruit production, but it also improv its quality. If the potash is lacking, the progress of the fruit is arrested about the time the seeds should form. Many kinds of apples that when well grown are highly colored and of excellent flavor will be small, col orless and generally inferior if potash is deficient. Apply more potash and the flavor will greatly improve the same season. There is much difference in the sweetness of grapes cording as the land has plentiful or sn amounts of potash. It is on its supply of this mineral quite as much as on climate that

ment of a spray of kerosene emulsion diluted

with ten times its bulk of water in early June

The broad leaves of the pe the crop very largely depends upon for ma-turing the tuber. It is important that they be kept green as long as possible. The fact that gypsum or land plaster attracts re makes it an especially good application for the potato crop. The first use of Paris green to destroy the potato larvæ ought PATENTS to be made with gypsum. By attracting moisture from the air and thus keeping the leaves moist more of the potato beetles' eggs will be destroyed before they hatch. Small Farms Pay Best Large farms are not the ones that pay best For information MUNN & CO. A farm of 25 acres that produces 60 bushels of corn per acre will give a profit, when a farm of 50 acres, producing only 30 bushels per acre, is operated at a loss; yet the total quan-Scientific American tity of corn is the same for both farms. The reason the smaller farm may pay is that less labor in proportion to yield is required. The larger farm will demand twice as much plow ing, cultivating and harrowing as the smaller one, and the expense of hauling and spread ing the manure, harvesting the crop, etc., is much greater. Berries. From now on berries require constant attention and water never should be spared. Strawberries getting one check by extra warm weather and a scarcity of water for a day of two will not recover lost vigor in fruitage for the remainder of the season. Blackberries too, require constant attention from the blooming season until maturity of fruit, and water should always be within command in case of emergencies, and the same applies t raspberries. · Bees are Animals. As a bee could not be admitted into the vegetable or mineral kingdom, there's noth-ing left for it but to get into the animal kingdom. Anything that has animal life is included in the animal kingdom. An animal is thus defined in the dictionary: "A sent int living organism broadly distinguished from a plant by incapacity to convert inor-ganic matter; a sentient living being." That definition very plainly includes the bee, so a bee is an animal, and is so called in law. A Scratching Place Don't fail to provide a scratching place for your fowls. Cover the floor with fine hay leaves or chaff to the depth of a foot or more, and scatter a handful of wheat (or millet seed if you can get it) into the litter, and let the fowls scratch for it. You will notice that those hens which do the most scratching lay the most eggs. They get needful exert look better, feel better, and lay more eggs than those which are denied the scratching Novel Potato Digger. A novel potato digger recently patente consists of a plow with the point in the cen tre and two flanges to turn the earth and th bers either way into two large revolvin wheels with latticework rims wide, which sift the dirt from the potatoes

THE STJON MR. ALBERT PHILLIPS visited Wood-stock at Easter, intending to be back in a few days, but while there was offered so good a position that he was tempted to remain. He writes us: "I got the position here be-cause I had been at the SAINT JOHN BUNI-NESS COLLEGE." 117

The new pastor of a church near New York told a pointed story recently at a reception tendered him shortly after he took charge A gentleman observing a friend seated on a That silver should be thoroughly dried, then polished with charnois, if it is to retain its builder beam of the should be thoroughly dried, lawn inquired what he was doing there. "Sitting on a wasp," was the reply. "Why don't you get up?" continued the interrogator. "I thought of doing that," answered the friend, "but I decided that I was burting the wasp as much as he was hurting me." "The moral of it," concluded the pastor, "is that if you do not sit on me I will not sting you." Too Particular. "Oh, dear! Listen to that now! Only fancy!" were the constant exclamations of a defendant in an action heard recently at a London County Court.

"Don't talk so much," snapped out Judge "I can't stay here and listen to such lies." pleaded defendant.

"Don't be so particular," retorted His Honor. "Think of me. I have to sit here and listen to them every day of my life."

Close Calculation.

Natural witticisms are always repeating themselves. Frances Power Cobbe says that the slats and legs are covered with cretonne. An old thick quilt has been cut to fit the about the distance to Hampstead Heath. At length they met a stranger, and one asked "Can you tell me how far it is to Hampstead Heath?"

"Ten miles," was the reply. The Irishman turned to his friend: "Five miles apiece!" said he. "We can easily do that."

An Uprising in His Midst.

"Speaking of Cuban uprisings and insur rections," said Wallace, "I shall never forge? one that occurred 20 years ago." "Were you present?" asked Ferry. "Very much so. It happened about five minutes after I had lighted one of my father's big, black Havana cigars."

A Stinging Remark

The late Professor Jewett had a curious way of commenting on the work that was brought to him by students. On one occasion he was shown a lot of Greek verses. After looking them over carefully, he glanced up for the should be increased. After heating rather blankly and said to the author you any taste for mathematics?"

-Young Housekeeper (to butch "What is the price of mutton?" Butcher-"Ten pence, mum." Young Housekeeper -"And lamb?" Butcher-"Thirteen pence, mum." Young Housekeeper (surprised)-

than half the size of a-er-mutton. More Fun for the Boy. I see that they have fishing reels with ball

bearings, now. Oh, of course. That only means further umphs for the tow-headed urchin with the ox-gad pole and bent pin for a hook. Got Off Lightly.

> See here, young man, said the minister, you never paid me that fee for marrying you You're mighty lucky I haven't sued you r damages.

-"No, George," said the mature, but still ovely maiden to her youthful adorer. "I can never be anything more than a mother to you. Your father spoke first." -"Why, Teddy dear, what is the matter

Don't you like asparagus?" "Yes, Miss Birchem; but the handles are so hot!" Minard's Liniment Cures Garget in Cows.
