

THE CANADIAN BEE JOURNAL

"The Greatest Possible Good to the Greatest Possible Number."

VOL. VIII, No. 6.

BEETON, ONT., JUNE 15, 1892.

WHOLE No. 314

JAS. HEDDON.

GENERAL.

Mr. Jas. Heddon, Dowagiac, Mich.

THE above is an electro of Mr. James Heddon of Dowagiac, Mich., who is so well known among the leading bee keepers of the world that it is scarcely necessary to more than mention his name.

Mr. Heddon is one of our most enthusiastic as well as successful bee-keepers, and also an able writer.

He has amassed a small fortune from his attention and untiring energy, combined with skill and ability in the business.

He is the inventor of what is called the Heddon hive and we believe he is the father of the pollen theory. Besides contributing largely to nearly all the Bee journals, he has written a very able work on bees.
