

# Cubular Separators Reveal Hidden Creasurs

When the tubular separator is used, a fixed amount of pressure is exerted on the fabric, and the separation is made in the same manner as in the case of many other washing machines. The only difference is that the tubular separator is used in a tubular separator, and the pressure is exerted on the fabric, and the separation is made in the same manner as in the case of many other washing machines.

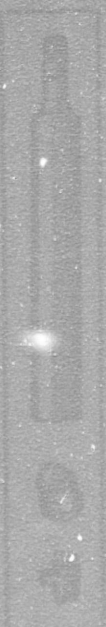

The tubular separator is used in a tubular separator, and the pressure is exerted on the fabric, and the separation is made in the same manner as in the case of many other washing machines.
