A HARDWOOD FLOOR

should be an artistic as well as a useful feature in the house. Wide boards with $\frac{1}{8}$ in. crevices between are not beautiful. Our floors are $\frac{5}{16}$ in. thick, are laid on top of any ordinary floor, are so perfect that a sheet of paper could not be inserted in the joints. They are made in oak, cherry, walnut, mahogany and other woods. Cost little more than a good carpet, and can be laid by any good carpenter. We quote prices to supply or supply and lay in any part of Canada. Send for sheet of designs and price list.
