CD/PV.410 7

(Mr. Turbanski, Poland)

I have already presented my delegation's views with regard to the work of the Committee on Outer Space. The work has started, though some valuable time was lost. It would be premature to make any evaluations of the Committee's work at the present session. Instead, I would like to stress that my delegation is looking for more intensive and more goal-oriented efforts by the Committee during its summer session. We hope that a new and important contribution to the work of the Conference on preventing an arms race in outer space will be provided by the Montreal workshop.

itret is space to epace remote sensing (which we refer to as Fakar A), desting with verification of screaments involving space objects. The second entabling space-to-cround remote sensing (which we refer to as Fakar B). however on bow to assist in the verification of sqreaments involving oriverticed forces. I want to discuse very briefly this somewhat distinctive branks control very general terms, outlining the context of multistant error control very constal terms, outlining the context of multistant canadian Forces.

From the cannet. PAISAT research has recognized the important technical, policioni and military realities and trends in addimenting the duter space issue. As a result, nartain theses form care elements of the PAISAT concept and cohiribute to the prespects of ectually realising such a multilateral verificantion system. These include the following:

Firstly, there much be the prospect of a significant multilateral acreement to warrant the level of sophistication of redinciony and the expenditure of funds required for the actual development of such an advanced commical warfilization system.

secondly, parties to and a multilateral apressant should have the

the thirdly, day of the Phisht system should be tracty-specifics it would be used only with respect to the surremants to which it empressly applied, as out of an overall verification process for those spreaments along.

Fourthly. the treaty balag verified would satablish the regulates
