

PHYSICIAN RESOURCE MANAGEMENT IN ATLANTIC CANADA
PROGRAMME EN N.S. BRUNSWICK, NEWFOUNDLAND, NOVA SCOTIA
PRINCE EDWARD ISLAND

This manuscript is a product of the Canadian Studies Research Grant Program. The program promotes research in the social sciences, journalism, business, trade, environment, and law with a unique relevance to Canada, or in the context of the bilateral or North American relationship; and the social, cultural, political, and economic issues that impact on these relationships in the 1990s.

Research grants are designed to assist individual American scholars, a group of scholars, and/or scholars working with a cooperating Canadian institution, in writing an article-length manuscript of publishable quality that contributes to the development of Canadian Studies in the United States and reporting their findings in scholarly publications.

According to the terms and conditions of the grant, the rights of the manuscript remain the exclusive property of the researcher. Copies of the manuscript are provided to the Embassy and the Department of Foreign Affairs and International Trade.

Research for this paper was funded by a Canadian Studies Research Grant. An earlier version of the paper was presented at the International Association of Health Policy 7th Congress in Montreal in June 1996. The author wishes to thank a number of people at the Departments of Health and the Medical Societies of the four Atlantic Provinces for their assistance in this study. However, the views expressed are solely those of the author.
