

natives of Tonga count the bananas and fish likewise by pairs and by twenties (*Tecow*, English score). The decimal and vigesimal system frequently run into one another, (*quatre-vingt, six-vingt, quinze-vingt.*) We do not believe we have erred, with respect to Radack, but the numeral system of the Owhyeeans, and other people of the Great Ocean, may, perhaps, require a more accurate examination.

The orthography fixed in the New Zealand Grammar, is natural and worthy of recommendation; and it is to be hoped that it agrees with that followed in the Otaheite books.

MANILLA. — VOLCANO DE TAAL.

THE drawing mentioned by us of the crater of the Volcano de Taal, will be found in the "Voyage Pitoresque," which M. Choris is going to publish at Paris, under the especial patronage of his Highness Count Romanzoff. This beautiful and faithful gallery of our voyage will greatly illustrate our observations and remarks. We often found it superfluous to describe what it was the province of the able artist to represent to the eye.

THE END.
