

CONTRIBUTIONS TO CANADIAN METEOROLOGY

—

Compiled from the Records of the Ice-Jam and Drifted Channel
reported by GEORGE SMITH, M.B., L.L.D., D.C.L., Professor
of Technology in the University of McGill College, Montreal.

The following Table has been drawn up for the purpose of showing
the magnitude of the ice-jamming in and of the breaking up of ice
channels within the last twenty-one years, and for illustrating
the character of the ice-jamming and its effects.
