

Machines is a striking proof of their great value, and their success has called forth a number of imitations; but at every exhibition for the last twelve years where they have been brought into competition with other machines, they have invariably been pronounced by impartial judges superior to all opponents, and have never failed to carry off the Highest Prize.

Being unable to meet the demands for my Implements and Machines last year, I have again enlarged my premises, and added New Machinery of the most approved kind, which warrants me in asserting that the facilities I now possess enables me to offer my production as the VERY FIRST OF THEIR KIND; and this is borne out by the many prizes awarded me when in competition with all the principal makers in Canada.

I invite attention to my new PATENT PORTABLE STEAM ENGINE. This is in fact the first successful Portable Engine yet introduced in Canada. To obtain the highest amount of power with the smallest quantity of fuel, is a most important point to be aimed at in the manufacture of a portable engine. This object I have kept in view, and it will be found in practice that my engines are both thoroughly efficient in working power and economical in the consumption of fuel.

It will be found on perusal that I have added a number of new machines to my already large stock.

I have also made arrangements with Mr. Cole, the Patentee, for the manufacture of his NEW PATENT IMPROVED SAMPSON TURBINE WATER WHEEL. This Wheel will be found the most Economical Water Wheel made.

The Works are situated on the line of the Toronto, Grey & Bruce Railway, within five minutes' walk of the station. The Montreal Telegraph Company and the Express Company both have offices here, in the Works, so that every facility for speedy communication is offered to the Public.

Thankful for past favors, I respectfully solicit a continuance and extension of the liberal patronage heretofore given me, being confident of my ability to give entire satisfaction.

JOHN ABELL.
