The Public will please note the promptitue

Mnch as has been said and mnch as has been written on the advantages of Life Assurance, language will never fnlly portray its beneficial effects.

The late Prof. DeMorgan said : "There is nothing in the commercial world so safe as a well-established and properly managed Life Assnrance Company."

Why ? Because the laws which govern human life are *immutable*—these laws are fnlly nnderstood and tabulated—from the rate of *mortality* and *interest*, the premiums are calculated with a certainty as absolute as anything finite can fairly approach. *Proper management* completes the "*safety*" so well understood by Prof. DeMorgan.

The fact that many Companies *have failed* is no argument against Life Insurance, as in every case such failure has been traced to the misappropriation of the Company's funds by a few unscrnpulous speculators who, by means of their subscribed capital or stock, obtained the management of the Company's business, and over whom the Policy Holders had no control.

We find no record of the failnre of any properly constituted Life Assurance Company, composed entirely of Policy Holders, who *own* its funds and *control* its management—who meet yearly to ascertain the state of its affairs in the past and direct its affairs in the fnture.

Snch a Company is PURELY MUTUAL!

Such Companies DO NOT FAIL!

THE ONTARIO LIFE combines all these favorable features and is the ONLY PURELY MUTUAL Canadian Life Assurance Company.

Life Assurance has run up in a few years from *nothing* to a zenith of splendor, power, proficiency and philanthropy which has no parallel in the world's institutions.

As a Social Force

Life Assurance stands high ; by it the widow is enabled to pay her liabilities, to keep her children together nnder her own care and influence, and to so educate and train them that they will become good and nseful members of society.

The Great Aim of Mankind
