Big Floating Supply of Wheat

Day of Almost Continuous Declines in Wheat Pit-Bull's Absolutely

there was a liberal floating supply of wheat in the market to-day developed more courage among hear traders than at any time in months. Latest figures showed a drop of 1-4c to 1 1-4c under last night. There was a net loss of 3-8c to 1c in corn, and a shade to 1-4c for oats. Previsions finished the same

as last night to 5c up.

It was a day of almost continuous declines in the wheat pit. One reason was that a cargo of wheat shipped out of here to Manitowoc last fall has been sold to come back to Chicago for delivery on May contracts. Further-more Buffalo persistently offered wheat here at figures that were almost as attractive as those made by Manitowoc. Receipts continued large in all directions, and foreign exchanges nearly without exception were weak, especially in Argentina. Forecast of snow in the winter crop belt added to the woes of the bulls.

Huge eccipts of Corn. An opening bulge on corn on account f cold weather was followed by a sharp decline. Receipts were on a huge scale, and because of an eastern blockade, shippers were not buying cash grades. Futures suffered accordingly. Many previously confident longs un-loaded, influenced in part by suggestions that Argentine corn hight be imported despite the 15 per cent, duty. One local leader was said to have let go of 1,500,000 bushels of May. That month, as a result of the extra pressure, slipped to a discount, and after having varied from 70 3-46 to 720 close. having varied from 70 3-4c to 72c, closed weak at 70 7-8c, a net loss of le even.

Slowness ruled in cash grades.
In cash, the trade appeared to be getting cut of commitments in May and taking more interest in July and September. Prices sagged in sympathy with wheat and corn. The light run

GRAIN AND PRODUCE.

There was practically nothing doing in the domestic grain market on Wednesday, business in both Manitobas and Omarios being about as flat as possible. The speculative exchanges across the border were weaker, with losses recorded in all commodities, but outside of inspiring a slightly easier feeling the reaction had no perceptible effect here. Ontario grains are not coming out, owing to the co. "Inare not coming out, owing to the co 'ition of the country roads, and, consequently, no activity is expected for the
near future. Similarly, there is little or

Mining Quotations.

Wednesday Evening, March 18.
A sharp upward movement in the orcupine stocks was under way in Erickson Perkins & Co. (J. G. Beaty)
wired:

Wheat—A purchase of 160,000 bushels of red winter wheat to come to this market from Manitowanae was undoubtedly a weakening influence. The weakness in May wheat and in corn naturally depressed deferred futures and may drag them some lower, but we prefer to adhere to the long side of July wheat.

Corn—After a steady opening, the market weakened perceptibly, with the May delivery leading the decline. The heavenness of the cash situation is the depressing feature, besides which speculative bulls seem for the moment to have supplied their wants. While the market has had a break of more than two cents from the high point, it must be borne in mind that this recent advance has been a very rapid one, so that this reaction can easily be followed by a further decline, unless cash conditions change materially.

Oats—The market, with other grains ruled steady carly, casing later. The market acts to us as if it would drag lower.

The stock opened at 27s 6d, an advance of about 35 cents ered with ice. There is very little wheat and especially where the fields were covered with ice. There is very little wheat left in the interior for seed, as the great poverty has caused government feediand, as the cattle were sold in the autumn very, cheap, this aggravates the situation. SHORTS ON THE RUN

The announcement in yesterday's World that several brokers and mining operators who had large holdings of Porcupine stock loaned out to the short 1,000 interest were calling in their shares 2,050 caused a good deal of comment on the 100 local "street" and was discussed freely in the brokerage offices. It was further confirmed by the statement of one house that it had called in a large block of Dome Extension on Tuesday, and that it had notified other borrowers that they must make delivery of the stock secured by them before the close of the week. The World heard in all of nearly 100, 000 shares of the various issues which 100 had been loaned to the "street," which had been called for immediate delivery. Under these circumstances a stampede of the short interest would not 500 come at all amiss.
