nine. We have all the means of grace that Methodism provides. Prayer and class meetings are well attended and are not lacking in spiritual life and power. Our congregations are good, and all the interests of Methodism have been well sustained. The Sabbath-school is prospering; we have about 50 of an attendance. We are indebted to the Sabbath-School Aid Fund for a very good library. We take 60 copies of our own Sabbath-school papers and three copies of the *Methodist Magazine*. Our appointment at the coal mines is discontinued, the mines having been closed. Members, 9.

CALGARY.—We are thankful to God for the measure of success attending the efforts that have been put forth to lay the foundation for the future growth and prosperity of Methodism in this new place. Enfeebled health and a gloomy financial outlook led us to undertake the work with considerable trepidation; and though throughout the year we have frequently felt unfit, physically, for the discharge of our duties, still, on a careful review, we see abundant cause for gratitude. The way was providentially opened up by which we were enabled to build and dedicate, free from debt, a comfortable and commodious church, well suited to the wants of the place, and costing about \$1,500. A fine new organ was also purchased and paid for, a Sunday-school organized that has grown rapidly and promises to be a source of strength to our cause. The congregations, for a place so young, have been excellent, and though some difficulty has been experienced in working the prayer and class meetings up to a real healthy standard, yet we regard the signs of progress as most hopeful, and believe that under careful management, Calgary will grow to be one of the most desirable and important of North-West stations.
