

OHIO FARMER SEIZED NOSE OF SHENANDOAH

**Ernest Nichols Tells How
He Roped Rushing Air
Monster**

**DID IT TO SAVE HIS
HOME AND CHILDREN**

**Cable Slipped Many Times
But Finally He Got It
Around Tree**

CALDWELL, Ohio, Sept. 12.—A hero of the Shenandoah disaster last Thursday morning was found among the native sons of Noble county. He is a little, grizzled farmer who raises turkeys, geese and some crops on a farm near Sharon, but he is the man who grabbed the navy's giant dirigible by the nose-roping and pulled it to the ground.

Many a time Ernest Nichols has tethered an angrier bull to a fence post, but not until last Thursday morning was he ever called upon to tame a rampant dirigible.

IS COMPLEMENTED.
The Board of Investigation recalled suggestions made by Lieutenant William Mayer and others who were in that portion of the ship that supported Nichols' story. Commander Jacob H. Klein, chief of the board, said, after hearing the story, that the Noble county farmer had done "a good job and a great service."

Ernest Nichols was found in an obscure corner of his barnyard feeding his turkeys and was apprised of the fact that he had done something important.

TELLS HIS STORY.
The story that the former told is as follows:
"Well, sir, I can show you better than I can tell you. I was in the house (he pointed to a three-room dwelling) when my neighbor called upon the telephone and said an airship was headed for my house and that I had better stop it."

"I ran out and here it came right through our orchard, headed straight for the house. After drifting all that way after it broke up, it was getting pretty close to the ground."
"It sure enough was coming right toward my house. I looked up and there was my oldest boy—I have six boys and one girl—sticking his head out of the upstairs window. I knew I had to stop that thing or the house would be smashed and my kids would be killed."

HEARD CALLS.
"Then, too, I heard the fellows up there (in the Shenandoah's drifting nose) yelling 'Grab hold! Grab hold! Turn her south!' So I grabbed hold of the cable that was hanging down and drew it around that fence post. The post snapped right off. I grabbed the cable again and threw it around that old maple stump."

"The stump had two prongs on it and I thought sure it would hold, but it didn't. By that time the nose was so close to the ground that the under side had me backed up against the fence and I had to run."

"I was headed away from the house then. But it knocked off the top of that shed and the wheel on that well and then bowed over that grape arbor. I kept following it and finally threw the cable around that tree."

150 FEET LONG.
"All that time I didn't know what the thing was. I didn't know it was so big. Why, it's over 150 feet long. "Soon my kids came running out and we helped it up. Then the men began climbing out. Even then it didn't stay where it was, for we had to tie it again several times during the day and the men borrowed my shotgun and punctured the gas bags."

CRIME WILL OUT

NEUSTADT, Germany, Sept. 12.—Traces of crimes committed in the sixteenth century are being brought to light here as workmen dig up a site sampled back then by a hostel for criminals. The hostel was kept by a mother and her son, and it was discovered that for years they had been killing and robbing rich foreign pilgrims and burying the bodies beneath the cellar floor.

KING'S DAY

CLEVELAND, O., Sept. 12.—Otto Longo, 12, and his wicked punching Boston bull, Klips, staged a boxing match here the other day which was a knockout with the school children, and also with Otto. In the fifth round the dog landed an uppercut to Otto's jaw, and he went down for the count. The boy taught his pet to box. He stands on his hind legs, and is about the same height as the boy.

SOUNDS SENSIBLE

LONDON, Sept. 12.—A beauty shop here is offering, for a small sum, to make young faces out of old through a course in muscle culture. The proprietor claims that just a flabby muscle of the arm may be made rounded and firm by exercise. The loose muscles of the face can likewise be made firm and more beautiful with proper exercise.

Poultry Prize Awards At Exhibition Are Announced

Continued from Page 8.

BROWN EGGS.
One dozen specials—First, Everley Poultry Farm; second, E. A. V. Gibson; third, Mrs. J. E. Rankine.
One dozen extra—First, Everley Poultry Farm; second, H. G. Harrison; third, A. V. Gibson.
One dozen firsts—First, Everley Poultry Farm; second, Boys' Industrial Home; third, A. V. Gibson.
Ten dozen extras—First, W. E. B. Tait; second, Everley Poultry Farm.
Thirty dozen case—First, New Brunswick Poultry Exchange; second, P. S. Fenwick; third, John; third, Gains Ltd., Saint John.

WHITE EGGS.
One dozen specials—First, W. C. Rothwell, Saint John; second, E. C. Wilson; third, Helen Parke.
One dozen extra—First, Everley Poultry Farm; second, E. C. Wilson; third, Walter C. Ferguson.
One dozen firsts—First, Walter C. Ferguson; second, Everley Poultry Farm; third, A. V. Gibson.
Ten dozen extras—First, Everley Poultry Farm.
Thirty dozen case—First, New Brunswick Poultry Exchange; second, P. S. Fenwick; third, D. J. Hamilton.

Grain Awards

FIELD GRAINS.
McIntyre Bros., Sussex—Six firsts, three thirds and one fourth.
Allan Beanson, Kingston, N. S.—Five firsts, six seconds and two thirds.
Home Bros., Winslow, P. E. I.—Two firsts, two seconds and one third.
C. G. Norton, Kingston, N. S.—Two firsts, five seconds and three thirds.
A. B. Gorham, Grey's Mills—One first, two seconds and two thirds.
SHEAF GRAIN.
C. R. Smith, Long Reach—Three firsts and two thirds.
P. E. Smith, Long Reach—Two firsts, one second, three thirds, one fourth.
Allan Beanson—Three firsts, three seconds, one third, one fourth.
A. R. Gorham—One first and one third.
H. W. Scovill, Upper Hampstead—One first.

GARDEN ASSORTMENT.
The silver cup offered by the Provincial Bank of Canada to the best assortment of garden products was won by Allan Beanson.

SCHOOL GARDEN.
Brynn C. Gorham, Greys Mills—Two firsts.

Boys' Industrial Home—One second.
HONEY AND BEE SUPPLIES.
M. Edith Weade, Royalton—Three firsts.
C. Allan Carter, Hampton—Three firsts.
John O. Miller, Centerville—Two firsts and two seconds.

BEES.
C. Allan Carter—One first and one second.
C. R. Starkey, Cady's—One first.

**ASK THIS
HALIFAX NURSE**

**She Is Willing to Answer Letters
From Women Asking About
Lydia E. Finkham's Veget-
able Compound**

Halifax, Nova Scotia.—"I am a maternity nurse and have recommended Lydia E. Finkham's Vegetable Compound to many women who were childless, also to women who need a good tonic. I am English and my husband is American, and he told me of Lydia E. Finkham while in England. I would appreciate a copy or two of your little books on women's ailments. I have one which I keep to hand. I will willingly answer letters from any woman asking about the Vegetable Compound."—Mrs. S. M. CULHAM, 24 Uniacus Street, Halifax, Nova Scotia.

Could Not Sleep Nights
Dublin, Ont.—"I was weak and irregular, with pains and headaches, and could not sleep nights. I learned about Lydia E. Finkham's Vegetable Compound by reading the letters in the newspapers and tried it because I wanted to get better. I have got good results from it and I feel a lot stronger and am not troubled with such bad headaches as I used to be and am more regular. I am gaining in weight all the time and I tell my friends what kind of medicine I am taking. You may use my letter as a help to others."—Mrs. JAMES RACHO, Box 12, Dublin, Ontario.

LASSIES BEAR

MOUNT KISCO, Me., Sept. 12.—While fishing from her yacht the other day Mrs. Walter M. Klements saw a bear swimming one-half mile from shore. Getting the toyline from the yacht she followed and landed the bear, dragging it under the water until it drowned.

STONE IS GOOD IN METAL MARKETS

**Trade Paper Sees Better
Business Outlook for
Fourth Quarter.**

**Construction Announcements
Continue—Some Advance
in Metals Noted.**

TORONTO, Sept. 12.—In a summary of the iron, steel and machinery markets, Canadian Machinery and Manufacturing News makes the following comment this week:
"Considerable strength is apparent in the metal markets, based to some extent on actual improvement in some lines, but largely on the prospects for increased business during the fourth quarter. Improvement is being actively fostered by executives in industry and, indeed, there are already developing indications that any ground lost during the summer months will be more than regained throughout the fall."

REPORTS OPTIMISTIC
One prominent executive in Toronto declares there has been greater gain made in his business, both in quantity and quality of turnover, during the last four months than through the last four years. While this is hardly applicable to the entire metal-working industry, these are other similar clips showing which way the stream is traveling.
The basic industries of the Dominion, pulp and paper, lumbering, and the production of power, and mining, are providing business for supply firms, and the larger engineering plants.

More than 1,100 men are engaged at the mills of the Algoma Steel Corporation, and prospects for steady employment for a number of months are good. It is understood that continuous operation of the merchant mill is assured for some time, while the company is making strenuous efforts to secure further rail business. Bar steel is being reduced by the merchant mill, in which department as well as in the open hearth division more men will be required soon.

BUILDING WORK.
Construction announcements continue to appear, strengthening the belief that the fall will be active for that section of the metal-working industry providing metals for building purposes. Tenders are being called for the erection of the Ontario Provincial Government building at the Toronto Exhibition. The Carter-Hall-Atlinger Co. has been awarded the contract for the Hudson's Bay Co. new \$5,000,000 store in Winnipeg. Foundation work has commenced. Buyers in the metal markets are

showing increasing interest in future supplies, while continuing their steady purchasing for present needs. Sellers are not at all anxious to quote on material for shipment past the end of this year, and few suggestions of prices for the first quarter have been heard. Contracting for the fourth quarter of 1925 is general, at current quotations. Some speculation is keeping the ingot non-ferrous market on the move, while at Montreal new strength has developed in scrap. Advances of \$1 a net ton have been made on cast wheels and stove plate, and of \$1.50 on boiler plate and scrap rails.

**USES FISH WASTE TO
MAKE CATTLE FEED**

**Nova Scotia Enterprise Employs
Heads and Bones to Produce
Meal.**

HALIFAX, Sept. 11.—The old story about the meat packing plants utilizing every part of the pig except its squeal might well be applied to the fishing industry in Nova Scotia. Not content with marketing fresh, cured or canned the parts of the fish suitable for human consumption and converting much of the remainder into fertilizer, the men who fish out of the ports of this province are making increased use of a new and profitable method of disposing of a portion of their product formerly classed as waste.

USED FOR CATTLE FEED.
The heads, bones and some other parts of the fish which under old methods would have been thrown overboard by the fishermen when they were cleaning and preparing their fish for the markets are ground into fish meal which is sold for cattle feed. This by-product industry since its establishment on a Halifax wharf last April has grown from one unit producing five tons of fish meal a week to six units producing thirty tons a

week and is being enlarged to meet an increased demand.

SOLD IN EUROPE.

To the fishermen this means a market for two hundred tons of fish waste a week. This is largely supplied by the trawlers of the National Fish Company, which operates the plant, but the company also buys the waste from independent fishermen.
At the present the whole output is being sold in England, Germany and Holland. The current price for the fish meal is \$72 a ton. Efforts are being made to develop a home market among Canadian cattle breeders.

BABY AIRPLANE

BRIGHTON, Eng., Sept. 12.—A baby airplane, so light that a man can pick it up and carry it, but with a capacity for 75 miles speed in flight, has been developed here. The machine has a six h.p. engine, and a wing spread of 20 feet. It will sell for about 250 pounds sterling.

SPEAKING OF PINS

LONDON, Sept. 12.—Though a majority of women now have bobbed hair, motorist carried the turtle away.

hairpin factories still do a big business. Part of this business is due to the fact that so many hairpins are lost. Six people in a five-mile walk here picked up 327 lost hairpins.

200-YEAR-OLD PET

BROOKHAVEN, L. I., Sept. 14.—Mrs. Edward Haynor has inserted a "Lost" ad in all the papers here for the return of a pet turtle, which she claims has been a pet of the family for 200 years. She thinks some thoughtless jority of women now have bobbed hair, motorist carried the turtle away.

**ORIGINAL AND GENUINE
BORSALINO HATS**

The Extra Process that Safeguards the Men Who Break Records

The greatest racing honors ever won in tire history have come to Firestone through Gum-Dipping.

At the Canadian National Exhibition, Firestone Balloon Gum-Dipped Cords demonstrated their extra strength and safety by winning the most important race of the meet. At Brandon, Calgary and other western tracks, this summer, new records were set on Firestones.

In the International Sweepstakes at Indianapolis, May 30th, a new world record was set on Firestones—101.13 miles per hour, for 500 miles—without tire trouble.

It was Gum-Dipping that made these speed kings confident on the treacherous turns, and carried them through the ordeal with far less than usual fatigue.

It accounts for the outstanding success of Firestone Full-Size Balloons—giving the flexible walls the extra strength to withstand the extra flexing strain.

Drive with perfect confidence in your tires. Enjoy new steering and braking control, and the easy riding that saves you and your car from shocks and vibration. Have the nearest Firestone Dealer apply a set of real Balloon Tires—Full Size! Gum-Dipped! Built only by Firestone!
