### NOW FOR DRIVE ON THE FLIES

Bangor to Launch Campaign Against Deadly Germ Carriers.

(Bangor Commercial.)

Dr. H. D. McNeil, full time health officer, is after the worst offenders on his list likely to interfere with the discharge of his duties and which are arriving in swarms, the flies. Bangor is soon to begin an anti-fly movement.

Dr. McNeil in talking with a Commercial representative Tuesday says that he is about to launch a campaign against flies. In his recent address at the Bangor Chamber of Commerce, Dr. McNeil absolutely refused to give the results of the multiplying of the stupendous numbers of flies by the still more stupendous numbers of germs they carry and left the figures fairly buzzing in the minds of his hearers.

From the state board of health Dr. McNeil received on Tuesday a circular which is a part of the campaign which is to be locally launched. Dr. McNeil proposes to put Bangor on the war map of the fly fight and he is asking everyone to help him by at least reading the following:

Don't allow flies in your house. Don't permit them near your food—especially milk.

Don't buy foodstuffs where flies are tolerated.

Don't eat where flies have access to the food.

Flies are the most dangerous insects known to man.

Flies are the filthiest of all vermin. They are born in filth, live in filth and carry filth around with them. They are maggots before they are flies.

Flies are known to be carriers of millions of death-dealing disease germs. They leave some of these germs wherever they alight.

Flies may infect the food you eat. They come to your kitchen or to your dining table, fresh from the privy vault, from the garbage box, from the manure pile, from the cuspidor, from decaying animal or vegetable matter, or from the contagious sick room with this sort of filth on their feet and in their bodies, and they deposit it on your food, and you swallow filth from privy vaults, etc. If you eat food that has come in contact with flies.

Flies may infect you with tuberculosis, typhoid fever, scarlet fever, diphtheria and other infectious diseases. They have the habit of feeding on tuberculous sputum and other discharges of those sick with these diseases, and then go direct to your food, to your drink, to the lips of your sleeping child, or perhaps to a small open wound on your hands or face. When germs are deposited in milk they multiply very fast; therefore milk should never be exposed to flies.

**Fight Flies.**  
Screen your windows and doors. Do it early before fly time and keep screens up until snow flies.

Screen all food, especially milk. Do not eat food that has been in contact with flies.

Screen the baby's bed and keep flies away from the baby's bottle, the baby's food and the baby's "comforthor."

Keep flies away from the sick, especially those ill with typhoid fever, scarlet fever, diphtheria and tuberculosis. Screen the patient's bed. Kill every fly that enters the sick room. Immediately disinfect and dispose of all discharges.

Catch the flies as fast as they appear. Use liquid poisons, sticky fly paper and traps.

**Eliminate Breeding Places.**  
Sprinkle chloride of lime or kerosene over contents of privy vaults and garbage boxes. Keep garbage receptacles tightly covered, clean the cans every day, the boxes every week. Keep the ground around garbage boxes clean.

Sprinkle chloride of lime over manure piles, old paper, old straw and other refuse of like nature. Keep manure in screened pit or vault if possible. Manure should be removed at least once a week.

Pour kerosene into the drains. Keep sewerage system in good order, and repair all leaks immediately.

Clean cuspidors every day. Keep five per cent solution carbolic acid in them all the time. Get rid of sawdust boxes used as cuspidors—destroy them—they are unsanitary.

Don't allow dirt to accumulate in corners behind doors, back of radiators, under stoves, etc.

Allow no decaying matter or any sort to accumulate in or near your premises.

Flies in the home indicate a careless housekeeper. Remember: No dirt—no flies.

**Wholesome Coffee**

Coffee can be 100% wholesome. Seal Brand Coffee is 100% wholesome and delicious.

**SEAL BRAND COFFEE**  
is the most perfect and satisfying coffee obtainable. Blended and roasted with infinite skill, its rich aroma and choice flavour sealed into the package.

At good grocers, everywhere. In 1/2, 1 and 2-lb. tins. Send for our free Booklet, "Perfect Coffee, Perfectly Made."

### TAKE BAN OFF CARS FOR U. S.

Canadian and American Railways Iron Out Trouble Over Freight Trucks.

New York, May 7.—The New York Evening Globe prints the following Washington special from its correspondent, Frank J. Taylor:

Representatives of Canadian and American railroads, in session here, have ironed out the differences over delivery of freight cars, which were largely responsible for the recent famine of newspaper among New York and other eastern newspapers.

The acute situation was brought about by the failure of the American roads, due to strikes and bad weather, as well as alleged carelessness, to return cars to the Canadian roads. As a result, Canadian officials placed an embargo, refusing to allow more of their cars over the line.

The difficulty was prevented from becoming a delicate international dispute by the prompt action of the Canadian Railways Association, which sent C. P. Riddell here to confer with the officials of the Car Service Commission of the American Railways Association.

Following several conferences between Riddell and W. C. Kendall, chairman of the Car Service Commission, both the Canadian and American officials declared they had reached a satisfactory understanding. Riddell stated that his organization would lift the blockade at once.
