THE QUESTION OF HEALTH

Dr. Carolyn E. Geisel, the brilliant Chautauqua lecturer, invites the man of middle age to place a higher estimate upon himself and to act accordingly, She tells him that in this period of records.

The outlook in the Yorkshire and Derbyshire mining districts in England is brighter today. The men will probably save the mines from further flooding, pending a settlement. upon himself and to act accordingly, She tells him that in this period of reconstruction the weight of the task is his, and that he owes it to his country and humanity to conserve his physical health and mental efficiency. She gives him encouragement by asserting that what he needs is not so much medicine as not to over-eat, to chew his food as thoroughcouragement by asserting that what he needs is not so much medicine as not to over-eat, to chew his food as thoroughly as Gładstone did, to drink plenty of water every day, to make his working hours reasonably short, to be sure that he gets plenty of sleep, and at least once a year take a vacation of two weeks or more, entirely away from home and work. Dr. Geisel asserts that the body will repair itself if given a chance, and that diseases which, when they become chronic, usually resist cure, chance, and that diseases which, when they become chronic, usually resist cure, can be prevented if taken in time. She would, however, have every man consult a physician at least once a year and submit to a thorough examination. What she prescribes is so simple that it is worth every man's while to be to that extent his own doctor. Far too many men pass out in middle life or very soon after because they do not observe the after because they do not observe the simple rules of health from day to day. Dr. Geisel presents some very startling APPROACHING VISIT OF facts about infant mortality, the increase of feeble-mindedness and insanity, and the very large percentage of deaths from brave preventable causes. It is worth noting, The\_hardships of an unknown wilder-

Prof. Leacock has broken out again.

The Toronto Globe says: "If the 'personal liberty' crowd of the anti-prohibitionist forces want the real thing in 'wet' propaganda they should invite what will an investigating committee what will an investigating committee to the committee of the committee Prof Leacock of McGill to make a few cost?" ks. the sick, advice for mother and babe, for those about to become mothers, anatomy, physiology, hy-giene, the treatment of slight ill-

nesses, burns, fevers, children's diseases, are all treated of in a common-sense way in "Nursing in the Home," a book of 500 pages, common-sense way in "Nursing in the Home," a book of 500 pages, profusely illustrated and nicely bound.

When our girls have studied this book on "Nursing," they will be better fitted to perform their duties as mothers, and infant mortality will be reduced. The best way to gain a practical knowledge of nursing is to read this book which is written for beginners, also for experienced mothers of families. It contains medical advice for every one, together with simple home treatments. To be had for 50 cents at prominent drug stores, or write publishers, WORLD'S MEDICAL PRESS, 654 Washington St., Buffalo, N. Y.

Note this diagram picture of a corn. Note its conical shape. The cause of the corn is pressure. And pressure makes it hurt. The point of the corn is pushed into the nerves. Applying a Blue-jay plaster instantly removes the pressure. Note the felt ring (A) in the picture below. The ring gives barefoot comfort in the tightest shoe.

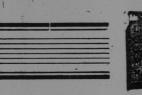

But that is temporary. One should not continue a ring. The corn should be quickly ended. The bit of B&B wax in the center of the ring does that (marked B in illustration below). In two days, usually, the whole corn disappears. It stops the pain, then ends the corn. And it wraps the corn so the action

Then the action of the B&B wax is centered on the corn. Held there by the rubber coated adhesive tape (C) which wraps comfortably around the toe. Healthy tissue is not affected.

These are the reasons why millions of people have adopted the Blue-jay method. Keeping corns is folly when this easy way can end them. Treating them in cruder ways is inexcusable. For your own sake, convince yourself by applying Blue-jay to one corn.

Blue = jay

## WORKMEN'S COMPENSATION ACT,

Notice to Employers of Labor

WHEREAS on the 17th day of April A.D., 1919, His Honor the Lieutenant-Governor and Council did by Order-in-Council bring within the scope of Part 1 of the "WORK-MEN'S COMPENSATION ACT, 1918," from and after

August 1st, 1919, the following industries, viz.:

"Persons employed in the woods in logging, cutting of timber, pulp-wood, fire-wood, railroad ties or sleepers, river driving, rafting, booming, or the transportation of logs, timber, pulp-wood, fire-wood

or railroad ties or sleepers."
NOTICE IS HEREBY GIVEN that all persons engaged

NOTICE IS HEREBY GIVEN that all persons engaged in any of the above mentioned industries are required to file a statement of their estimated payroll from August 1st, 1919, to December 31st, 1919, inclusive, with the said board, on or before the 1st day of August, 1919.

AND FURTHER NOTICE that any employer neglecting or refusing to furnish such estimate or information is liable to a penalty not exceeding \$20.00 per day for each day of such default, and is further liable for damages, as provided by Part two of said Act, in respect of any injury to any workman in his employ during the period of such default.

NOTE—Forms for furnishing such information will be supplied on application.

supplied on application.

Also please take note of the following regulation passed by the board, and coming into force on the 1st day of August, 1919:

In an industry where ten or more persons are employed, it shall be the duty of the employer to provide a suitable FIRST AID KIT approved of by the board and in charge of a suitable person. Certified, passed May 1st, 1919.

### Specific Problems Met in **YOUR Business**

Suppose when INVOICING, you had this problem: 13,423 yds. at 5 1-8 per yard—\$687.93 Could you find the result—and know it was correct—in 5 or 6 seconds?

Suppose, when FIGURING DIS-COUNTS, you had this problem: \$687.97 less 5% and 2% . . -\$640.50 Less 3731 lbs., at .41 per 100 lbs. 15.80

Could you find all amounts—and be sure you were correct—in 10 or 12 seconds?

Suppose, when FIGURING INTEREST, you met these problems: \$5000.00 for 121 days 4 3-4 % . -\$ 79.83 \$5000.00 for 211 days 4 3-4 % . - 139.20 Could you get the results of both items in 5 or 6 seconds?

Suppose, in PAYROLL WORK, you had items like these:

Less Balance
141 "cuts" (2) 18½c—\$19.03 1.15 \$17.88
152 "cuts" (2) 13½c— 20.52 4.29 16,23
134 "cuts" (2) 13½c— 18.09 2.37 15.72

Could you find all these results in 20 to 25 seconds and be so sure of accuracy that you would not have to CHECK

office or factory.

### Filling the Gaps in Your Office Force

A GREAT many firms tell us that not only is it next to impossible to get clerical help, but many of those they do get are untrained and therefore inaccurate in their work. Fortunately this situation can be greatly relieved by the use of the Munroe Calculating Machine. One girl and a Monroe can do the work formerly requiring two or three men. She doesn't need to be an expert. With a few minutes' instruction and practice, she can place your figure load

and you can be assured the work is absolutely accurate because the MONROE Mechanical Check puts a ban on operating mistakes. No rechecking is required. Look at any one of the problems listed at the left and compare the time required by the Monroe to solve it with the old pencihand-paper method. The Monroe has a range of utility that embraces any figure problem in any business.

Mr. Manager, it is a difficult matter for you to determine the efficiency of the Montroe Machine by our telling you about it. Let us send a representative to demonstrate what it will actually accomplish in respective to demonstrate what it will actually accomplish in respective to demonstrate what it will actually accomplish in respective to the sense of complish in your own office.

You can then make your own tests and compare it with any other machine you may have in service, All of which means we have perfect confidence in the ability of the Monroe Machine to "make good," To bring the matter to a head simply mail the attached soupon. No obligation involved.
