CORRESPONDENT SUGGESTS THINGS FAIRVILLE NEEDS

Fairville, N. B., June 1.

Sir,—Might I be allowed a little space in your valuable paper?

A good deal of time has been devoted lately by prominent citizens of Fairville in discussing ways and means concerning the improvement and uplifting of the community. On Saturday a tag day was in progress for the purpose of raising sufficient money to establish an up-to-date play ground for the children.

Although I am in entire sympathy with any movement which tends to better our town, I think a walk down Main street, on Saturdays, would convince any person that what we need far more than play grounds is a water-cast. Clouds of dust rolling in all directions, made it anything but pleasant out of doors. With the prevailing high winds we have had this spring, the streets of Fairville resemble a scene in a sand storm in the Sahara desert.

I doubt also if a careful observer could discover more than six yards of decent sidewalk in the whole parish of Lancaster. Crumbling and broken asphalt forms the sidewalks and from year to year nothing is done in the way of repairs, while hundreds of pieces of paper are blown hither and yon from the ash trays in dirty back yards which sadly need a spring cleaning.

Certainly the public play ground is a splendid institution in congested cities, but here in Fairville, a few steps will bring the children to green fields and trees. What better play ground could be wanted?

If there is any money to spend, let us start first in doing a little towards cleaning up our streets, banishing dust nuisance, and making of Fairville a clean, tidy community, instead of being the dirty, unkempt town, for which it is now noted.

I remain respectfully,
A RESIDENT.

HOW TO PREVENT ACID STOMACHS AND FOOD FERMENTATION

BY A STOMACH SPECIALIST

As a specialist who has spent many years in the study and treatment of stomach troubles, I have been forced to the conclusion that most people who complain of stomach trouble possess stomachs that are absolutely healthy and normal. The real trouble, that which causes all the pain and difficulty, is excessive acid in the stomach, aggravated by food fermentation. Hyper-acidity irritates the delicate lining of the stomach and food fermentation causes wind which distends the stomach abnormally, causing that full bloated feeling. Thus both acid and only step necessary is to neutralize the acid and stop the fermentation by taking in a little warm or cold water immediately after eating, from one to two teaspoonfuls of bisulphated magnesia, which is doubtless the best and only really effective antacid and food corrector known. The acid will be neutralized and the fermentation stopped almost instantly, and your stomach will at once proceed to digest the food in a healthy, normal manner. Be sure to ask your druggist for the bisulphated magnesia, as I have found other forms utterly lacking in its peculiarly valuable properties.

Vacation Death Roll

During every holiday season the newspapers record a startling number of accidental deaths among pleasure seekers.

Supposing you should lose your life while on your vacation this year, what will happen to your family? Do you realize, that you've a duty towards them that doesn't end with your death?

Perhaps your wife hasn't been trained to be a bread-winner. But your failure to protect her until she dies—till the children are educated and self-supporting—may place your widow into the business grind in spite of her incapacity.

It's not a pleasant prospect, is it? But isn't it a possible contingency? To offset it you need an Imperial policy to perpetuate your income after you're gone.
