

# COLLEGE LECTURE FOR PRACTICAL LIFE

## Doctor Parkin In Chair at London Lecture

### A NEW PROJECT

#### Rhodes' Idea Turned to Operation for Benefit of English Youths—Some Odd Wills—Jews of London Protest Against Features of Naturalization Act

(Times Special Cable.)  
London, May 7.—How university men may be fitted for practical life was the problem of the solution which Doctor A. A. Shipley, of Christ's College, Cambridge, devoted a recent lecture before the Royal Colonial Institute this week.

Doctor G. M. Parkin, who presided, said he was naturally interested in a question of this kind because the administration of the wonderful idea of Mr. Rhodes had to some extent been committed to him. Mr. Rhodes' great thought was to send the young men whom he saw growing up in different parts of the world—young fellows full of the vigor of new continents, men who could ride and shoot—to this country to pick up that outlook and finer culture which came from an ancient civilization.

The aim of the International Interchange of Students Association was to bring the students of this more refined, more central, and older civilization into closer touch with the practical things of the great continents. He had often said that if some millionaires wished to do as much good as Mr. Rhodes did in organizing his scholarships it could be done by providing scholarships by which young gentlemen could go abroad and enjoy in the great universities of the United States, Canada and other parts of the world, the same advantages which Mr. Rhodes' scholars did when they came to the old country. It would give to this country the kind of wider training that was particularly required.

**Fitting University Men for Life**

Doctor Shipley said he wished to speak on the problem of fitting men for their practical post-academic life—"the greatest problem which educationalists and other leaders have to cope, and a problem which cannot be regarded as parochial or national in its character."

"It is not even limited by imperialism," he international for have we not to educate many boys and young men for life in the colonies and in other countries? And will not those who remain in these islands in after-life be compelled to cope with foreign competition, involving new methods and new conditions which make it incumbent on them to march with progressive times? It is the young men with the greatest aptitude to compete with the developing methods of other countries who will be the most sought after by the means of preventing many of the young men whose minds have been broadened and sharpened by some practical experience who are adaptable to new conditions, are those who command the highest economic value.

"The present carries out the great work of the practical nature of education, and one of the results of this is that not infrequently the young man who in the ordinary course of events, would leave school, at fourteen or so, prompted by their own desire to go to the world, to find their own way, they maintain themselves, altogether or partly, by working during a couple of hours a day after school at any odd jobs that may be available. In this country, where they rarely consider another method, they possess the particular capacity necessary to enable him to obtain a good education, so far as practical life is concerned. He may be a mere bookworm, but he has a little room for him in the hard, practical life of every day. President Van Hise, of the University of Wisconsin, has stated publicly that what they want is not more scholarships, but more opportunities to be provided to enable men to 'work their way through college,' as it is called. There can be no doubt, he says, that from among such men, who while at the university were engaged in some of the various occupations some of which some men would have thought menial, a far greater number of men who will achieve great things are to be found than among the ranks of the wealthy, many of whom are sent to college by parents and friends. Those who have taken advantage of the higher education of the universities of our day have incurred a debt which money can never repay. Education can never be paid for in so much hard cash. The recipient owes a debt which can only be liquidated by service to the public. It is impossible for the college man to be a miser and prejudiced as others. Indeed, it is not improbable that his public school and college life have contributed to this result. He is by no means equipped for his sphere of leadership even at Oxford or Cambridge. He needs to be brought into intimate contact with the realities which lie outside his college precincts.

"This can only be successfully accomplished by practical educational travel under the direct supervision of an association capable of directing the student in his search for information and placing within his reach, with a minimum of expenditure, the best sources of the desired knowledge that are to be found in the world. That travel will teach him of the mutual dependence of the nations of the world. The grand tour used to be considered essential to the complete education of a gentleman. If it were carried out, it is needless for me to urge upon you its greater utility today."

**Some Odd Wills**

Some queer directions have been given by people in England in their wills. In the last statement of Florence Nightingale appeared this clause: "I give my body for dissection or post-mortem examination for the purposes of medical science; my original request was that no memorial or possibility for the appearance of the body which is developed in them, should the expression of such wish render invalid my other wishes, I limit myself to the above-mentioned directions, praying that my body may be carried to the nearest

# No More Corns

## No More Dangerous Paring

Nobody needs to suffer from corns since Blue-jay was invented. Millions apply this little plaster. The pain stops instantly. Then the B & B wax gently loosens the corn. In 48 hours the whole corn comes out—root, callous and all. Blue-jay has done that for fifty million corns, without any distress, any trouble, any delay or discomfort.

Common treatments mean just a brief relief. Blue-jay ends the corn. Paring a corn just removes the top layers. The main part is left to grow. And in myriads of cases paring causes infection. All these methods are wrong. Soon or late the corn must be removed. Why trifle and delay? Blue-jay removes it in two days. In the meantime you forget it. Please prove this—for your own sake. It is the only right way to treat corns.

At the picture is the soft B & B wax. It loosens the corn. B protects the corn, stopping the pain at once. C wraps around the toe. It is narrowed to be comfortable. D is rubbed on the sensitive plaster on.

# Blue-jay Corn Plasters

Sold by Druggists—15c and 25c per package  
(10) Sample Mailed Free. Also Blue-jay Bunion Plasters  
Beaver & Black, Chicago and New York, Makers of B & B Handy Package Absorbent Cotton, etc.

# Our New Perfection Broiler

Is pleasing many women. It enables the housewife to broil as well on the New Perfection Stove as over a coal fire.

It uses all the heat. It cooks evenly. It broils both sides at once. It doesn't smoke.

And of course you are familiar with the New Perfection Oil Cook-stove. It is such a convenience all the year round. It will boil, cook, roast and toast just as well as a regular coal range.

Ask to see the New Perfection Stove at your grocer, butcher, or hardware store. It has cabinet top, deep shelves, special racks, etc. It has a built-in broiler, and a special rack for broiling. It is a real kitchen helper. It will save you a great deal of money. It is a real kitchen helper. It will save you a great deal of money.

THE IMPERIAL OIL COMPANY, Limited

# 12 Tumors Removed Without An Operation

Dear Mrs. Currah—I am enjoying better health than I have for many years, and I think I am entirely cured. I have none of the old symptoms. I am very grateful for your present health, and think it is due to your treatment.

Silver Lake, Ont., Sept. 20, 1910.

for women the world knows. It is a simple, safe, and effective treatment for all kinds of gynecological troubles. It is a real kitchen helper. It will save you a great deal of money.

# MORNING NEWS OVER THE WIRES

Dr. E. B. Fisher returned yesterday to Fredericton after a visit to Fair Haven, Deer Island, where there are seven cases of smallpox, some serious. Quarantine has been established.

The Boston and Yarmouth S. S. Co. has been incorporated with a capital of \$300,000 head office in Montreal.

John L. Peeney, late city engineer of Fredericton, received last night from his brother members of the A. O. U. H. there was a handsome traveling bag. He will leave on Monday for St. John to take a position with the Dominion government.

Clarence V. T. Richardson who is nearing execution has developed what is described as a hysterical coma by the authorities. He is in a state of collapse. He asks continually for comfort from brother members and one is constantly with him. The man who executed will take place early on Tuesday morning.

In Boston yesterday the charges brought in the counter-claim for divorce against Mrs. Mildred Woodruff by her husband were pronounced untenable. There has as yet been no decision in her suit for divorce. Her friend, Miss Atkinson, trained nurse of Shelburne, N. B. was generated.

Before the British investigating committee in London yesterday Sir Cosmo Duff

# Father, Mother, Sister, Brother, All Should Use Parisian Sage

Prevents Baldness—Banishes Dandruff—Stops Falling Hair and Itching Scalp

PARISIAN SAGE is a family hair tonic and dressing that will do much good in every home.

The man who uses PARISIAN SAGE is only occasionally bald. Baldness is caused by dandruff germs which grow down into the roots of the hair, destroy it's nourishment and cause the root to die and the hair to fall and thin out.

PARISIAN SAGE is a scientific hair remedy that not only kills the dandruff germs, but gives the hair root just the same nourishment that nature gives it. PARISIAN SAGE first kills the germs; then nourishes the weakened hair root and causes a growth of healthy hair.

"No, I closed my eyes and pretended to be asleep."

"You know," he was saying, "I couldn't see a woman stand up while I was sitting down." "So you gave her your coat?" "No, I closed my eyes and pretended to be asleep."

# Indoor Winter Life

The way we live in winter time is not conducive to health. There is too much living in close, stuffy rooms, and breathing over and over again the impure air. Too much artificial food and too little exercise in the open air.

All this tends to make the blood thin, weak, watery and impure. The nerves are starved, exhausted and weak. The nerve force required for the proper workings of the heart, the lungs, the stomach, the liver, the kidneys and other organs is not forthcoming, and the whole system becomes weakened and run down.

When spring comes vitality is at low ebb, and nine persons out of ten require restorative treatment, such as Dr. Chase's Nerve Food, to form new, rich blood and re-vitalize the wasted nervous system.

Disease lurks on every wind in the spring time, and finds lodgment in the weak, run-down and exhausted system. You can protect yourself by using Dr. Chase's Nerve Food. Rich red blood is the greatest of germicides. People with pure blood throbbing through their arteries need have little fear, for disease germs seek out the weak and exhausted for their easy victims.

# Dr. Chase's Nerve Food

## The Greatest of Spring Restoratives

Makes the blood pure, rich and red. It fills the blood with the red corpuscles which go to build up and restore the system and fight off disease.

This great food cure is a wonderful help to every person in the spring. It does away with headaches, tired feelings and the extreme lassitude which makes life miserable to so many people at this time of year. 50 cents a box. 6 boxes for \$2.50, at all dealers, or Edmanson, Bates & Co., Limited, Toronto.

# MINISTERS SINGLED OUT FOR ATTACK

Press Campaign in Russia Against Kokoletoff and Sazonoff—Nothing to War Talk

(Times Special Correspondence.)  
St. Petersburg, April 30.—Two ministers of the present cabinet stand clearly out in the imagination of patriots, place-hunters and fortune-seekers as fit objects of attack—the premier, Kokoletoff and the foreign secretary, Sazonoff—and accordingly every lever is being set in motion to discredit their policy and turn them out of office.

Between Kokoletoff and the nationalist party, which the late Premier Stolypin created, antagonism was a foregone conclusion for he is not a continuer of the policy of his predecessor. He is a moderator. The late Premier Stolypin took up the cry of "Russia for the Russians," and interpreted it in a way which gave deep offence to the other nationalities.

Stolypin's narrow views found in Kokoletoff a sharp critic, and his measure an uncompromising opponent. The former was by reasoning. Stolypin was a fanatic. He was a financier, whose main object it was to build up Russia's credit and keep her supplied with the wherewithal to reorganize her land and sea forces and carry out all necessary reforms.

As his perception of immutable facts is keen and his courage active, he allows due weight to the public opinion of Europe even when he differs from it. Hence he has set limits to the coercion practiced against the Jews, the Finns and the nationalities generally, and has thereby brought the whole colony of horists about his ears, besides which the nationalities are, of course, disaffected because, being Russian, he has not entirely "served Stolypin's policy and treated them as the chosen people."

Sazonoff is another representative of the same school. By temperament and conviction he is a believer in a policy which, aiming at the furtherance of Russia's best interests, does not consider Stolypin's policy and treated them as the chosen people.

Sazonoff is another representative of the same school. By temperament and conviction he is a believer in a policy which, aiming at the furtherance of Russia's best interests, does not consider Stolypin's policy and treated them as the chosen people.

# Sixty Houses for Amherst

Amherst News.—The building committee appointed by the board of trade some weeks ago held its second meeting in the town hall last evening and A. S. Curry, C. J. Silliker and J. E. Lusby were appointed a committee to confer with a loan society to see what terms could be arranged by which fifty or sixty houses could be built at once in different sections of the town to accommodate the various industries.

As an initial movement, it is proposed to raise \$60,000, portion of this to be advanced by a loan society to be subscribed by the merchants and manufacturers of the town. From the views expressed by the different members of the committee and by several gentlemen present, it was not anticipated that there would be any difficulty in raising the necessary funds so as to start building operations at an early date.

# THE ACUTE PAIN FROM NEURALGIA

Permanently Cured Through the Use of Dr. Williams' Pink Pills.

Neuralgia is not a disease—it is only a symptom of a very painful one. It is the worst sign that your blood is weak, watery and impure, and that your nerves are suffering. Red blood is the only cause—good, rich, red blood the only cure. There you have the real reason why Dr. Williams' Pink Pills cure neuralgia. They are the only medicine that contains in correct proportion the elements needed to make rich, red blood. This new blood reaches the root of the trouble, soothes the jagged nerves, drives away the nagging, stabbing pain, and restores your health in other ways. Among the sufferers from neuralgia, cured by Dr. Williams' Pink Pills, are Mrs. Clara Brown, Durham, Ont., who says: "For months I suffered intensely from neuralgia. The pain in my head and face at times was so great as to be almost unbearable. I tried two doctors, and many remedies, without finding a cure, so there seemed to be no let-up to the pain. Finally I was advised to try Dr. Williams' Pink Pills, and I began their use. Soon I found the pills began their work. The trouble entirely disappeared and has not since bothered me. If you are suffering from any blood or nerve trouble begin to cure yourself today with Dr. Williams' Pink Pills. You can get these pills from any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont."

# RASH SO BAD BABY CAME NEAR DYING

Head Broke Out. Spread to Arms, Legs and Entire Body. Itched So He Would Scratch Until Blood Ran. One Box of Cuticura Ointment and Nearly One Cake of Cuticura Soap Cured Him. Has Had No Return.

"When my boy was about three months old, his head broke out with a rash which was very itchy and ran a watery fluid. We tried everything we could but he got worse all the time, till it spread to his arms, legs and to his entire body. He got so bad that he came near dying. The rash would itch so that he would scratch till the blood ran, and a thin yellowish stuff would be all over his body in the morning. I had to put mittens on his hands to prevent him tearing his skin. He was so weak and thin that he took fainting spells as if he were dying. He was almost a skeleton and his little hands were thin like sticks."

"It was bad about eight months when we tried Cuticura Remedies. I had not laid him down in his cradle in the daytime for a long while. I washed him with Cuticura Soap and put on one application of Cuticura Ointment and he was so soothed that he could sleep. You don't know how glad I was he felt better. I took one box of Cuticura Ointment and nearly one cake of Cuticura Soap to cure him. I think my boy would have died but for the Cuticura Remedies and I shall always remain a firm friend of them. He was cured more than twenty years ago, and there has been no return of his trouble. I shall be glad to have you publish this true statement of his cure." (Signed) Mrs. M. G. Mattland, Jasper, Ontario, May 27, 1910.

For most that a greedy, aggressive and economical treatment for their skin-tortured little ones in Cuticura Soap and Ointment. Although they are sold by druggists and dealers everywhere, liberal samples of each may be obtained from the Potter Drug & Chem. Corp., One Price, 65 Columbia Ave., Boston, U.S.A.

# City Cleaning Campaign

The Gloucester, Mass., Times, says:—"Last month 22,000 copies of the public notices of a city cleaning campaign. Of this number 20,000 cleaned their own premises, and the other assisted in the cleaning up of public or semi-public places. And it is safe to say that, as a result, the city is cleaner than it has been for many a long day. The accumulations of the winter are gone, and the city looks fresh and good as it should in the springtime. There are 150 good results about such a campaign on the part of the school children. One of the immediate cleanliness of the city. Another is the love of order and beauty which is cultivated in the children who actually take part in such a movement. Having cleaned up once, they are more likely to do so again. And there might be added as a third thing, the sense of responsibility for the appearance of the city which is developed in them, and to be kept in such condition as shall make for the largest pleasure and good of the entire population."

# PARISIAN SAGE

PARISIAN SAGE is a scientific hair tonic and dressing that will do much good in every home.

The man who uses PARISIAN SAGE is only occasionally bald. Baldness is caused by dandruff germs which grow down into the roots of the hair, destroy it's nourishment and cause the root to die and the hair to fall and thin out.

PARISIAN SAGE is a scientific hair remedy that not only kills the dandruff germs, but gives the hair root just the same nourishment that nature gives it. PARISIAN SAGE first kills the germs; then nourishes the weakened hair root and causes a growth of healthy hair.
