PRECEDENTED ATTRACTION

The Winter of 1889 9 was a favourable one for logging operations, and all the out in the section came to market early. In this respect we were much more favoured than other timber districts. Considerable St. John stock only arrived at market about the close of the season, and driving expenses were excessively heavy.

The adjacents from this port were the largest since 1883, aboving an increase of 37,000,000 superficial feet over last precord, and the stocks are supported to the stock of the season, and driving expenses were excessively heavy.

The support of which is compensated for by reduction in the stock being wintered, which is the smallest on record, and the stocks are supported to the stock of the season, and driving expenses were excessively heavy.

There has not been any reduction in the Stumpage tax referred to so fully in my circular of 3rd January, 1887. This tax, with mileage charge added, amounts to one dollar and fifty cents per 1000 superficial feet, or 12/sterling per St.
