HYPOPHOSPHITES, first discovered by Dr. Churchill, of Paris, so far back as 1827, as the Remedy for Consumption, Throat, Bronchial and Chest Diseases compounded according to his recipe, still stands unrivalled, year by year adding fresh proofs to its curative effects. It is recommended by the leading Physicians of Europe and throughout the Colonies; is palatable to take, promotes appetite, strengthens the nerves and muscles, improves digestion, creates healthy blood, and restores the phosphorus originally existing in the system. A fuller reference, however, to the action of this invaluable preparation will be found on page 8. The Victoria Hypophosphites, so well known throughout the country, is prepared according to the Formula of the Original Discoverer himself, and is obtainable at any Drug Store in Canada.
