## BELLISS & MORCOM EQUIPMENT

*is Helping Develop  
Canada's Mining Industry*

With mines operating at capacity output there must be no questioning the reliability and efficiency of the equipment installed. That's why you'll find Belliss & Morcom Steam Engines, Turbines, Diesel Engines, Condensing

Plants and Compressors at work in so many of Canada's leading mines. The unfailing dependability of operation and economy of service of this equipment has won it the preference of mine operators everywhere.

1,000 KW. Belliss & Morcom pass-out Turbine at Canadian National Railway Shops, Montreal. These turbines are also adapted to mine use.
