

Pelvis, contracted—*continued*.

- due to disease of vertebral column, 390
- due to tumours of pelvic bones, 391
- generally contracted, 358
- generally contracted, that, 361, 362
- mechanism of generally contracted, 374
- outline of pelvic brim in principal varieties of, 391
- rare forms of, 383
- Perforation, 673
- Perforator, 673
- Perimetritis, 513, 534
- Perineum, and vulva, rupture in labour of, 429
- laceration of three types, 497, 688, 689
- primary repair of, 688
- Peritoneum, Fallopian tubes and ovaries in puerperal infection, 514
- Peritonitis, general puerperal, 532
- pelvic, 513, 534
- Peters' ovum, 12, 15, 18, 24
- Phlebitis, 513
- Phlegmasia alba dolens, 515, 536, 538
- clinical features, 537
- lymphatic, 537
- statistics, 539
- thrombotic, 536
- treatment, 539
- Physiology, of first and second stages of labour, 225
- of puerperium, 483
- of third stage of labour, 249
- Pigmentation in pregnancy, 65, 68, 69
- Pinard, 438, 473, 683
- Placenta, 23
- necessary, 91, 142
- and membranes in twin pregnancy, 87
- anomalies of size and shape, 142
- anomalies of umbilical insertion, 143
- at term, 38, 39
- bacteria transmitted from mother to foetus through, 38
- battledore, 143
- bipartita, 142
- changes occurring at the site of, 31
- circular sinus, 41
- degeneration of, 145
- degeneration of, at term, 41
- development of maternal circulation through, 35
- digital removal of, 461, 462
- diseases of, 141
- enormous number of villi present in, 32
- expression of, 301

Placenta—*continued*.

- expression of, by pushing contracting uterus downwards and backwards into pelvis, 467
- foetal surface, 39
- haemorrhage and oedema of, 145
- infarcts of, 41
- lobes of, 142
- maternal surface, 40
- morbid adhesion of, preventing expulsion, 458, 463
- multiloba, 142
- pathological infarction of, 145
- premature detachment of, 569
- retention of, 457
- separation of, by formation of retro-placental clot, 248
- separation of, from below upwards, 250, 251
- solid tumours of, 145
- succenturiata, 91, 142
- syphilis of, 146
- tripartita, 142
- tubercle of, 145
- velamentous, 144
- with extensive haemorrhage and vesicular degeneration of chorion, 132
- Placenta, non-expulsion of, in abnormal labour, 308
- by irregular uterine contraction, 459
- by morbid adhesion of membranes, 459
- by morbid adhesion of placenta, 457, 458, 463
- by uterine inertia, 457
- Placenta praevia, 62
- and accidental haemorrhage, differential diagnosis between, 446
- and puerperal septicemia, uterus from a case of, 510
- as cause of breech presentation, 324
- basal, 433, 434
- Cesarean section in treatment of, 454
- capsular, 434
- central, 439
- haemorrhage due to, causing death, 435
- introducing De Ribes' dilating be 451, 606
- lateral, 439, 440
- marginal, 439
- mortality of, 456
- pulling down a leg, 449
- symptoms and influence on labour of, 442
- treatment of severe cases of, 448
- treatment of slight cases of, 453
