

DEERING TWINE

IS JUST WHAT THE TAG SAYS IT IS.

We put up our twine in ordinary shaped, flat sacks (see illustration below), which are useful about the farm when twine is used. These bales stand up nicely, and you can stick a bale under your buggy seat or in some odd corner of your wagon load.

WE use rope in tying our bales—15 feet to each sack. Use this to tie up your cattle or the colts.

There are about 2 lbs. of bagging and ties to each bale, which are counted in weight of twine, and have to be paid for. Why not buy

DEERING

and get value for every cent paid out?

Our twine is even and strong; made under very close inspection. We make more twine than any three other twine concerns in the world. Last year we made 36 per cent. of all twine used in the United States and Canada. We use nothing but the very best Philippine Manila fiber. There is a range of 4 cents per lb. between lowest and highest grades of Manila fiber. You will now understand why some concerns offer cheap twine, which you would find dear at any price. The Philippine war has made the price of good twine high this year.

ROYALTY in Europe have found it profitable to use DEERING MACHINES on their estates. We mention Lord Salisbury and Lord Roseberry, and the Estate of Prince Bismarck, of Germany, as examples, and have not space to mention more.

Every Canadian farmer, lord of his own broad acres, should own a DEERING, and save trouble, worry and horseflesh.
