**The McCormick Binder**

A BINDER is necessarily an important machine. All the more necessary for avoiding mistakes, by getting something of standard kind.

All McCormick harvesting machines are recognized as the standard in their particular line.

And especially is this true of the binder.

Here are a few of the reasons why:

- The main frame forms a rigid and solid foundation for the machine to rest upon.
- The drive chain is strong and durable.
- The machine is equipped with roller bearings.
- Hence it is exceedingly light in draft.
- It has an improved clutch.
- Its countershaft cannot become wound with straw.
- Wide range of adjustment on reel—lifts high in cutting rye and other tall grain and lowers to pick up down grain.
- Both the main and grain wheels are provided with raising and lowering devices, so that

the machine can be adjusted to any height of stubble.

But you want to know, too, about the knottor, the beautiful simplicity, the adjustment, the work.

And you want to know them thoroughly and in detail.

We can only mention them here, just to put you in mind.

But be assured you cannot know too much about the binder you buy.

We provide a way for everybody to know.

In addition to grain and corn harvesting machines the McCormick line embraces Mowers, various styles and sizes of Hay Rakes, Hay Stackers and Binder Twine.

Call on the McCormick Agent for information or write nearest branch house for catalog.

**Frost Wire Fence**

Means a Lifetime of Service

Because running wires are heavy, is no reason why the fence is strong. Soft tie wires—soft wire stays—locks that crimp—mean weakness and simply invite trouble.

A fence with soft wire stays must be very high, or horses and cattle will crowd down the top wires. Extra height means extra cost. Pigs find it easy to raise the bottom wires of such a fence and creep through.

**FROST WIRE FENCE**

is a fence of strength. The running wires are high carbon, HARD coiled steel, thoroughly galvanized—and will not break under 2200 pounds.

Our stays are No. 7 or No. 9 hard wire.

And running wires and stays are LOCKED with the FROST LOCK.

We wish you would write for a copy of our booklet. It tells a lot about Frost Fences in particular, and gives information about fence building that every farmer ought to know. It's FREE to YOU
