## Farm Bookkeeping and Farm Management

These are two vital subjects to every farmer who is anxious to make progress, provide himself with a better home, educate his children and enjoy some of the comforts of life. The book entitled "Farm Management," by G. F. Warren, is regarded by all authorities as the very best information on the subject of farm management that has yet been published. The author has made a life-long study of the success due to the proper management of farm business. Probably seventy-five per cent. of the farmers in Western Canada are losing anywhere from \$100 to \$500 per year, according to the size of their farms, by not applying the best business methods to their work. How many farmers are able to tell how much money

they are making out of their farm and which branch of their farming operations is paying the best returns? No matter whether a farmer is engaged in grain growing, livestock, dairying or any other system of farming, he will find it dealt with in this book.

Perhaps the most valuable portion of the book is that showing farmers how to keep simple records and accounts. This matter is set forth so clearly that even the most ignorant farmer can take a note-book and pencil and work out a system of bookkeeping that will show him whether he is making a profit or loss and which department pays him the best. We sold several hundred copies of this book last year to farmers in the three provinces and every purchaser was well satisfied with the book. It contains 600 pages, is printed in large type, well illustrated and fully indexed, and handsomely bound.
