Pake Postage Stamps Worth \$74,610.

Chicago Postoffice the Scene of the Perpetartors.

value of \$74,610 were abstracted from the stamp vault of the Chicago post- to the wagon. office by operators, who bored a passage through a steel floor in order to reach their plunder.

If they had calculated their distance six feet to the west from the point where they worked they undoubtedly would have carried off nearly \$40,000 in cash and \$800,000 in stamps. The burglars' plan of operations was al-most identical with that followed by the robbery of the vault of the Selby Smelting Company ,near San Fran-

the building and by digging trenches and tunneling through cross walls gained a point immediately under the vault. The steel sheets forming the floor of the iron room were bored, hole of sufficient size to admit the body of a man was made, and through this one of the robbers pass ed the plunder to one or more ac complices below. The plunder was carried nearly 300 feet through trench under the building and the loaded into a wagon that was waiting in an alley behind the building police say that a mail wago may have been used, as they say the presence of an ordinary wagon in the rear of the postoffice would probably have attracted attention.

The work of forcing an entrance to the vault had evidently been going forward with the greatest patience for many days. It is believed, how ever, that the intention of the thieves has been to enter the cashier's vault, in which there was \$35,000 in mone. and stamps valued at hundreds of thousands of dollars. The bottom the vault is of steel, half an incl thick. In this seven holes were bored. until a space eighteen inches square -just enough to allow the entrance of a man's body-had been so weak ened that it was possible to take ou the whole plate with little difficulty A dry goods box stood over the ho thus made and concealed the work of the robbers while it was in progress When discovered today the finge marks of one of the burglars were still discernible on the dust of the

So carefully had the job bee planned that men working in othe parts of the building had not the slightest inkling of the daring robhere heine worked almost under their

a temporary affair and the men had only to open a little door to admithemselves under the flooring. To reach the vault it was necessary crawl about 300 feet over odds and ends of boards which littered the way. The route evidently had bee carefully studied, for a detective who went under today without knowledge of locations became lost and was nearly overcome by the foul odors before assistance reached him.

Having secured their plunder, the robbers loaded it into the wagon, drove across a vacant lot and turned into Wabash avenue in front of the art building. Of the stamps taken, \$4,712 were in "postage due" stamps and \$2,260 in special delivery stamps So the convertible stamps amounted to \$67.828, but of these \$4.828 were Pan-American stamps of 8 and 10-
