## ROOFING!

THE JAMES ROOFING COY.

CEMENT AND GRAVEL ROOFERS.

42 VICTORIA STREET, TORONTO

IT IS A WELL KNOWN FACT  
THAT

McCOLL'S  
"LARDINE,"

is the best known and most reliable Machine Oil in the Dominion. Farmers, Threshers and Mill Owners, will find it decidedly to their advantage to insist upon getting the "Genuine Lardine" when they ask for it, owing to so much inferior oil being sold under the same name by unscrupulous dealers. We are the sole manufacturers of the "Genuine Lardine." Every barrel branded

## WISTAR'S BALSAM OF WILD CHERRY,

which does not dry up a cough and leave the cause behind, but loosens it, cleanses the lungs, and allays irritation, thus removing the cause of the complaint. CONSUMPTION CAN BE CURED by a timely resort to this standard remedy, as is proved by hundreds of testimonials. The genuine is signed "J. Wistar" on the wrapper. SETH W. FOWLE & SONS, Proprietors, Boston, Mass. Sold by dealers generally.

Burdock  
BLOOD  
BITTERS

regulating their functions to a healthy action by opening all the natural channels for the outlet of foul accumulations and bad humors, which poison the blood and create disease.

BURDOCK BLOOD BITTERS

Never weaken but strengthen and build up the debilitated system, while performing their work of purification.

## Household Hints.

**DRAFNESS CURED.**—A very interesting 132 page Illustrated Book on Deafness. Noises in the head. How they may be cured at your home. Post free 3d.—Address DR. NICHOLSON, 30 St. John Street, Montreal.

**THICK AND THIN PUDDING.**—One tea-cupful of tapioca soaked in three cupful of milk five hours, stirred occasionally. Pour over six sour, cored apples filled with sugar. Sauce.

**TO CLEAN MIRRORS.**—Sponge them perfectly free from dirt, drying with soft cloths, and when quite dry rub a little powdered blue over the glass, polishing it finally with a soft old silk handkerchief.

**LEMON MERINGUE.**—Pour one and one-half pints of boiling milk on three fourths of a pint of bread crumbs. Add one cupful of sugar, the yolks of four eggs, one tablespoonful of butter, juice of one lemon. Bake. Make meringue of the whites of four eggs.

**PICKLED CRAB APPLES.**—Stem the apples, after piercing them with a fork. Prepare a syrup of one pint of good vinegar, one pound of brown sugar (more, if liked) and a scant tablespoonful of each kind of spice. Boil ten minutes and pour over the apples after they have been placed in the jar.

**CRANBERRY JELLY.**—Simmer one quart of cranberries in half a pint of water for half an hour, then squeeze water and berries through a jelly bag, add one pound of sugar, boil for ten minutes and try. Excellent jam may also be made from cranberries by following the instructions given for jam making.

**ORANGE FLOAT.**—One quart of water, the juice and pulp of two lemons, one coffee-cup sugar. Let it come to a boil and put in four tablespoons corn starch. Stir it continually until it has boiled about fifteen minutes. When cold pour it over four or five oranges that have been sliced thin, and over the top spread the beaten whites of three eggs sweetened and flavoured with vanilla.

**ENGLISH MUFFINS.**—Let the cook tear off from her bread dough before breakfast one pint of the dough (for five persons), and softer this with sweet milk, beaten in until it is the consistency of batter, thin enough to drop from the spoon, but not to spread much on the griddle. Each muffin should be half an inch thick in its muffin hoop or ring, and should be torn apart, not cut. After mixing with the milk let the muffin batter rise for an hour before baking. Let your griddle be set on the range over night.

**APPLE JELLY.**—Apple jelly which is delicious with custards and cake, can be made at any time during the winter. Take half a peck of juicy, tart apples, quarter and core but do not pare them; put into a kettle with two lemons cut up with them and cover well with water. Let them cook until reduced to a pulp, when strain through a flannel bag. To every tumbler of juice add two-thirds of a tumbler of white sugar. Boil hard for twenty minutes, put in a glass and cover next day, using brandied paper next the jelly and cover the glasses with paper wet with flour paste.

**TOMATO FIGS.**—Take six pounds of sugar to one peck (or sixteen pounds) of the fruit. Scald and remove the skin. Cook them over the fire, without the addition of water, until the sugar penetrates and they are clarified. Then take them out, spread on dishes, flattening them, and dry in the sun, sprinkling occasionally with a small quantity of the syrup; when dried pack in boxes, with powdered sugar between each layer. The remaining syrup may be bottled for use. They keep well from year to year, retaining their flavour, which is nearly that of the best quality of fresh figs. The pear shaped or single tomato answers best. Ordinary brown sugar may be used, a large portion of which is retained in syrup.

**PEACH JAM.**—Very ripe peaches, or the sound portion of those which are partly decayed, may be used for jam. Peel them thinly with a silver knife, remove the stones, and weigh the cut peaches; allow one-third as much sugar, by weight, as peaches; when all the peaches are cut, put them into a preserving kettle with the sugar strewn over them; set the kettle over the fire, let its contents boil gradually, and boil them gently and steadily for two hours, skimming them as often as any scum rises, and stirring them occasionally; when the jam begins to grow thick, it must be stirred constantly to prevent burning. Cool it before putting it in the jars, cover with a round of white paper dipped in brandy, and then seal air-tight.

**MILBURN'S AROMATIC QUININE WINE** fortifies the system against attacks of ague, chills, bilious fever, dumb ague and like troubles.

## CATARRH.

A New Home Treatment for the Cure of Catarrh, Catarrhal Deafness, and Hay Fever.

The microscope has proved that these diseases are contagious, and that they are due to the presence of living parasites in the lining membrane of the upper air passages and catarrhal tubes. The eminent scientists—Tyndall, Huxley and Beale—understand this, and these authorities cannot be disputed. The regular method of treating these diseases is to apply an irritant remedy weekly and even daily, thus keeping the delicate membrane in a constant state of irritation, accompanied by violent sneezing, allowing it no chance to heal, and as a natural consequence of such treatment not one person in a hundred has ever been cured. It is a sad fact that these diseases cannot be cured by an application of a stronger remedy than once in two weeks, for the membrane must get a chance to heal before any application is repeated. It is now seven years since Mr. Dixon discovered the parasite in catarrh and formulated his new treatment, and since then his remedy has become a household word in every country where the English language is spoken. Cures effected by him seven years ago are still there, having been no return of the disease. So high are these remedies valued, and so great is the demand for them, that ignorant imitators have started up everywhere, pretending to destroy a parasite of which they know nothing by remedies the results of the application of which they are equally ignorant. Mr. Dixon's remedy is applied only once in two weeks, and from one to three applications effect a permanent cure in the most aggravated cases. N.B.—For catarrhal troubles peculiar to females this remedy is a specific. Mr. Dixon sends a pamphlet describing his new treatment on the receipt of ten cents in stamps. The address is A. H. Dixon & Son, 303 King Street West, Toronto, Canada.—Scientific American.

Sufferers from catarrhal troubles should carefully read the above.

Campbell's  
Cathartic  
Compound

(Liquid.)
