Scientific Digestive Preparations.

During our past decade we have led every advertiser to increased proteolytic and diastatic activity. We now make contribution to a few leading products in this line.

Peptin Cordial: One teaspoonful will completely digest 3000 grains of coagulated and disintegrated egg albumen. One fluidrachm will curdle 12 ounces of water milk in a few minutes. A palatable and active preparation.

Essence of Peptin: Our Essence possesses the same curdling power as the Cordial. In point of proteolytic activity each fluidrachm digests 2000 grains of egg albumen.

Liquid Pancreatin: A concentrated preparation possessing all the digestive properties of the pancreatic fluid. Two fluidrachms will permeate 16 fluidounces of milk in from one to one and a half hours at 110° F. A permanent preparation admirably suited to various combinations.

Laka-Diastase: Beyond all comparison the most potent form of Diastase ever placed on the market and producing the proved carbohydrate influences in assisting and distressing symptoms of starch dyspepsia. The clinical experience of distinguished specialists is embodied in the literature which we furnish on application.
