IMPROVED SINGLE PILLAR DORMANT

Warehouse or Hopper

SCALE

With Cut-off Lever

With . or . without
Drop . Lever

Improvement secured by Letters Patent, issued 28th
January, 1891

♦ ♦ **G.M.'S SCALE** is much cheaper than the Double Pillar Dormant, but is equal to it both in strength and accuracy. All the strain and leverage is exerted directly on the pillar instead of bearing on the cap piece as in the two pillar scale, thus effecting a saving of two iron pillars and heavy cap piece required at the double pillar pattern. It has an advantage over double pillar in that a Drop Lever may be used to let down the platform when not in use.

It is more accurate than the ordinary Single Pillar Dormant Scale, as the cut off lever removes half the pressure which in the ordinary scale causes straining and deflection of the beam, and it is the beam of new scale works more freely and indicates more correctly. Each weight it bears on point weighs twice the weight on platform that it does on the ordinary scale.

The removal of so much strain and pressure prevents the parts from breaking or wearing so quickly, and the improved scale will be found to be much more durable than the ordinary scale.
