

A Reliable Energy Supplier

Canada is, and will remain, a reliable source of energy.

SOURCE: U.S. DEPT. OF ENERGY

While Canada is the largest single foreign supplier of energy in the U.S., it accounts for less than 4% of total U.S. energy use.

Virtually all U.S. imports of electricity and natural gas come from Canada. Much of the bilateral trade in energy is carried out through long-term contracts which assure Americans of energy supplies until well in the next century.

CANADIAN ENERGY EXPORTS TO THE UNITED STATES As a Percent of Total U.S. Imports
