

Source: 1986 and 1987 - External Trade Statistics, Imports,  
Department of Statistics  
1988 and 1989 - Computer Print Outs, Imports, Department  
of Statistics.

N.A. = not applicable. This is because there were coding  
changes for 1988 onwards. These do not have much effect  
at the 3 digit Group level although care needs to be  
taken when comparing at the 8 or 9 digit Item level.

Notes (i) The categories included in this Table cover all food  
and beverage items except for : live animals; unmilled  
grains and cereals; and feeding stuff for animals.

(ii) See next page for Coding Classifications. These were  
current up to and including 1987. 1988 3 digit Group  
Codes are similar except for the division described as  
Meat and Meat Preparations. Canadian sourced imports  
were negligible in these categories (011-017).
