

Prairie 3670G15 ▼

When cold and wet conditions prevail, Acton's waterproof Prairie boot provides excellent protection. The 30.5 cm high green rubber boot features a warm, removable felt liner, stretchy net lining, steel shank and anti-slip design outsole. Its adjustable nylon collar-top prevents snow or other particles from entering the boot. The Prairie is available in full sizes from 6 to 13.

Flying Boots 3060G11 ▲

Both air and ground crews appreciate the environmental protection offered by Acton's flying boots. Worn over combat or safety boots, they provide good cold weather defence, while their black neoprene soles and uppers render them

oilproof. The knitted nylon tops are silicone-coated and water-repellent, and the heavy foam rubber insulation adds warmth. The 28 cm front zippers assure quick on-off operation. They are charcoal grey in colour and are available in sizes 4 to 13.

Mukluk Flyer 4094G11 ►

Designed for use with cold weather flying suits, Acton's Mukluk Flyer is similar to the army mukluk except its heel and sole area has been reduced to accommodate flying clothing and aircraft controls. The boot features a black rubber moulded sole and heel bottom integrally vulcanized to a polyamid black upper with eyelets and lace closure and 2.5 cm width leather strap. The ankle strap prevents boot loss during high-speed ejection. For effective cold weather protection, the Mukluk Flyer must be used in conjunction with duffle socks and insoles. It is 22 to 24 cm high and available in sizes 6 to 14.
