## "EATON BRAND"---Clothing of Quality for Men

It is in producing such clothing as "EATON Brand" that the work of the tailor may be termed a science and an art. The men who design "EATON Brand" clothing, the men who do the cutting, the men who shape the garments and the men who add the finishing touches that give "EATON Brand" clothing distinction are all experts in their work.

"EATON Brand" clothing is tailored from materials of high quality, and the linings and inter-linings are selected goods, and it is constructed to retain that finished appearance which it leaves the workrooms. The coats are carefully moulded into shape and have haircloth linings the whole length of the front.

Glorious Report from Finance  
Committee—Good Results  
at Orphanage.

The sessions of the Supreme Court the Independent Order of Foresters held yesterday noon. The morning session was devoted to the consideration of the report of the inspection committee, who investigate the various statements of the order and the constitution of the report of the finance committee. During the discussion of the report of the finance committee it was pointed out that when the capital of the Union Trust Company had been reduced from \$2,500,000 to \$1,000,000 returned to the order, that the personal attention of the chief ranger, in addition to the work of 5 per cent. per annum had been earned, the order had made a net profit of \$300,000.

The work in connection with the orphan and fatherless children of the order is a very important one, and among the members of the Independent Order of Foresters, and the report of the finance committee recommending that the contribution fund be 2c per month instead of 1c was carried unanimously. The work of caring for the orphan and fatherless children is a natural part of the philanthropic character.

Work of Orphans' Home. The Home for Orphans, which is situated at Oakville, about twenty miles from Toronto, took tangible form in 1905, and in November of that year opened. Its international character at once became evident, for the first child to arrive was a little girl, and she was followed by fatherless little ones from Peru, Alabama. While the originator of the idea, the late Dr. Oranoyatekha,

contemplated a home for those who were left absolutely friendless, yet a wider view of this noble philanthropy was seized by the present supreme chief ranger, Elliot G. Stevenson, who learned of many children of deceased Foresters, whose condition was quite as hopeless as if they had been left absolutely orphans. Widows were left in a distressing state of poverty, and were faced with the task of separating from their dear ones by sending them to public institutions or distributing them in the neighborhood. The result was that, in cases where a high standing committee found that a widow of one of the members was engaged in a hard hand struggle to keep her family together, to feed, clothe and educate them, a money grant, varying, of course, according to the conditions found, should be made thru the recording secretary of the local court.

575 Children Protected. Under this arrangement 575 homes, each essential and valuable in its sphere, have been held together and protected, while 328 children, drawn from European institutions and as well as all parts of United States and Canada, are being cared for by the society. Over 50 more have been benefited indirectly because, thru this relief, the mother has been able to remain happily. So that in all over 575 children in these few years have been protected by the ministrations of the society, at that period in their lives when care and discretion are most needed.

Assumes Parental Duties. In these days when sociological problems are being discussed and publicists are pointing to the tendency towards race suicide, it is remarkable and commendatory that a large fraternal brotherhood like the I. O. F. should assume by its own act the parental responsibilities and become the provider and mainstay of the home. What this means mentally, morally and physically to the younger generation, and what it will mean to Canada when these, whom fate has cast upon our bounty, become citizens of the Dominion, cannot be overestimated. It has often meant, as those associated in the work well know, the difference between hunger and plenty, between nakedness and protection, between exposure and shelter. Often indeed the negative situation would have resulted in vice, and a consequent cost many times in excess of the philanthropy to the country.

A "Happiness Fund." The organization of the society is so maintained that these wards are in constant touch with the head office. In some cases the children are twenty miles away, but they are encouraged in educational progress, prizes are awarded for high standing in class, and frequently the little ones address the kindly hearted superintendent as "your affectionate boy" or "your loving child." These evidences of appreciation are not wasted upon the big hearts at the head of the order. Not the least significant feature in the 540,000 members of the "Happiness Fund"—a trust fund made up entirely of voluntary contributions from high courts, subordinate courts and private members, which is so disbursed that a Christmas present and a birthday gift go regularly to each child, as well as prizes to those who are successful at school. The system is so followed that the child who has been benefited by his natural parents finds in the members of the society foster parents whose sympathies are touched and whose purses are opened. Who knows that times have not in her kept the day when three little ones will not of their foster parents "rise up and call them blessed."

### BANISH PIMPLES AND ERUPTIONS

In the Spring Most People Need a Tonic Medicine.

If you want the best of health and new strength in the spring you must build up your blood with a tonic in diet. Following the long, indoor winter months most people feel depressed and easily tired. This means that the blood is impure and watery. It is the state of the blood that causes pimples and unsightly eruptions. To this same condition are due attacks of rheumatism and lumbago; the sharp, stabbing pains of sciatica and neuralgia; poor appetite, frequent headaches, and a desire to avoid exertion. You cannot cure these troubles by the use of purgative medicines—you need a tonic, and a tonic only, and among all medicines there is none can equal Dr. Williams' Pink Pills for their tonic, life-giving, nerve-restoring powers. Every dose of this medicine makes new, rich blood which drives out impurities, stimulates every organ and brings a feeling of new health and energy to weak tired out, ailing men, women and children. If you are feeling out of sorts give this medicine a trial and see how quickly it will restore the appetite, revive drooping spirits and fill your veins with new, health-giving blood.

Dr. Williams' Pink Pills are sold by all dealers in medicine or will be sent by mail at 50 cents a box or six boxes for \$2.50 by addressing The Dr. Williams Medicine Co., Brockville, Ont.

### POWER FOR MONTREAL

New Company Wants to Develop From the Ottawa River.

MONTREAL, May 5.—The incorporation of the National Hydro-Electric Company with a capital of \$1,000,000, makes one more electrical company which will seek a market in Montreal.

Henry Miles is the president of the new corporation, and Mr. Louis Gosselin the secretary. The Carillon Falls on the Ottawa River, 35 miles from Montreal, will be the source of the power. This point is a strategic one in the rush for power development, was noticed in the report of the surveyors for the Georgian Bay Canal, who considered that 148,000 horsepower could be developed, of great value, owing to its proximity to Montreal.

### IRONWORKERS GAIN POINT

Eight Workers on Hospital Wing to Get Their Increase.

The striking iron workers gained one point yesterday when "Gill" Goddard signed a contract to pay the men he expects to employ on the new surgical wing of the hospital a minimum of 40c an hour for the year. This will affect only about eight men, however. Otherwise there is no change.

Neither is there any change in the situation of the moulders and core-makers' strike. A sub-committee was appointed by the executive committee to confer with the bricklayers and ask them not to work on the iron parts of buildings. Some of them have been reported as doing this in order to expedite their own work.
