before them of GREAT GAINS, and a  
 minimum chance of loss. The services  
 of a practical and thoroughly reliable  
 man, who has explored the Kootenay,  
 have already been secured for the com-  
 pany in British Columbia.

(2) The company will also promote  
 and form other companies, both on this  
 continent and in Europe, for the pur-  
 pose of acquiring and operating mines  
 now secured or to be secured by this  
 company.

(3) Will deal in mining shares and  
 act as mining brokers generally, and  
 appoint agents throughout Canada and  
 elsewhere to represent the company,  
 and especially the brokerage depart-  
 ment of the company.

(4) Will be a medium of information  
 to its shareholders on all matters per-  
 taining to mining and mining stocks  
 in Ontario, British Columbia and else-  
 where, enabling each shareholder to re-  
 ceive the VERY LATEST NEWS from the  
 company's confidential agents at  
 the mining centres.

(5) Having its private prospectors,  
 good claims can be secured at first cost,  
 of which every shareholder gets the  
 profit and ALL THE PROFIT. Ordinarily  
 mining companies are often carried  
 at tens of thousands of dollars  
 beyond the first cost, thereby depriving  
 the shareholder of the first and fre-  
 quently the largest profit. Every por-  
 tion of a private prospector and

claims lying between the Slocan Bay and  
 the Payne Group of Mines on the Other

shipped \$40,000 worth of ore. Washington  
 has enough ore in sight to run its 20-  
 stamp mill for 200,000 worth of ore, and  
 \$200,000 worth this winter. One-half interest  
 weeks ago for \$100,000 in cash. Limited  
 miners' stock will be sold at this time at the  
 R. H. TEMPLE, 9 Toronto Street.

**THEY HAVE A GOOD THING.**

Continued from Page 6.

development and not to rob the mine.  
 Kamloops has one device advanced  
 over any other camp I visited in that  
 a loaded wagon may be driven to any  
 of the mines direct, without expending  
 a dollar for roads. The main line of  
 the C. P. R. is only two or three miles  
 away, and the country is like the Foot-  
 hills of Alberta, covered with grass,  
 which supports thousands of horses  
 and cattle the year round, but di-  
 versified with clumps of fine timber.  
 Kamloops City is only five miles from  
 the Iron Mask by the wagon road, and  
 is called the Inland Capital. It has  
 the finest climate in Canada, is a well-  
 known resort for pleasure-seekers and  
 invalids, and is a great distributing  
 point, having fine waterworks, electric  
 lights, and gold schools, both public  
 and private.

**Machinery on the St. Paul.**  
 Rossland.

Machinery is now on the St. Paul,  
 and before the end of the week a steam  
 drill will be working night and day,  
 continuing the tunnel, which is in 22  
 feet, to strike the main lead of the  
 claim. This property, which is quite  
 well known, is situated to the south-  
 west of the White Bear and Mayflower  
 No. 2, southeast of the San Francisco  
 east of the O. K. and I. X. Le Hol.  
 main lead runs in the same direction  
 as that of the White Bear, Black Bear  
 and Le Hol. Development, we have  
 shown pretty conclusively that the Le  
 Hol claims, to the westward of the  
 Annie Fraction, California and  
 claims already mentioned, through the  
 surface showing on which the St. Paul  
 was located is a very wide one, run-  
 ning in a southwesterly direction  
 through the whole length of the claim.  
 It appears about 500 feet up the gulch  
 that runs down from the O.K. Pre-  
 vious to the organization of the com-  
 pany the chief work done was to sink  
 a shaft of 25 feet on this showing and  
 crosscut from the bottom for 12 feet  
 either way. Both shafts showed a di-  
 stinct vein, one from which ran from  
 24 to 35 in gold. Other shafts and  
 open cuts were made on the same  
 vein, which proved it to be continuous  
 with good mineral throughout. From  
 these three 100 feet deep and abut  
 100 feet from the chief one Capt. Ad-  
 ams, who was in charge and lately, took  
 out about 1500 lbs of ore which on sale in  
 Toronto upon his return yielded \$130.

The proposition being evolved  
 tunnelling on the company started  
 work from the Red Mountain Rail-  
 way track and drove a vein tunnel of  
 50 feet. The contract has just been let  
 to D. W. Slickney to continue it for 200  
 feet further, which will show a large  
 vein, the ledge, giving a depth of  
 about 250 feet. Mr. Slickney is put-  
 ting up a 25 horse power boiler, and  
 will have a steam power drill at work  
 before the end of the week. The en-  
 try of the tunnel is at the level of the  
 level of the railway track, when ore is  
 ready for shipment the facilities for  
 loading it, it could not be surpassed.

When excavating for the blacksmith  
 shop this working iron-bearing rock  
 was found, and was found to be a  
 prospecting tunnel following what  
 appeared to be a vein of iron and  
 angles from the main ledge. This  
 working is in 16 feet, and rock from  
 the whole face of the vein is sold  
 and copper in almost every piece  
 broken off. A great deal of quartz  
 is in, and the indications are good  
 for a body of pay ore being found  
 there. Considering the width of the  
 main vein of the claim, the steadily  
 increasing values obtained with depth,  
 and the fact that development on ad-  
 vancing claims has shown a vein run-  
 ning in the direction of this one and  
 of the same quality of ore, every indi-  
 cation points now to the St. Paul prop-  
 erty to be one of the mines that will  
 make the camp famous.

The tunnel now to be pro-  
 ceeded will cut the vein at a depth of  
 250 feet, and when that lead is worked  
 out the tunnel can be run 300 feet fur-  
 ther down the hill, giving so much ad-  
 ditional stopping ground. Enough  
 treasury stock has been sold to keep  
 work going a year. Dr. Marais, in-  
 expert sent out by the French Govern-  
 ment to report on the property, was so  
 well satisfied with the property upon  
 examination that he purchased a block  
 and a large block is under option to  
 English parties. It is probable that  
 most of the treasury stock will be  
 placed in England.

**Kelley Creek Gold Mine.**  
 Word has just been received by F.  
 McPhillips, secretary of the Kelley  
 Creek gold mine, from Mr. Douglas,  
 one of the directors of the company  
 who has just returned from the property,  
 stating that everything is looking most  
 satisfactory, and the general opinion  
 of the district is that the Kelley Creek  
 gold mine should prove one of the best  
 mines in the province.

This company has only been a short  
 time on the market, and we understand  
 that the stock is selling very rapidly.

The directors are all good business  
 men, and will certainly look after the  
 interests.

We understand that so far no man-  
 ager has been permanently engaged,  
 but the directors are now on the look-  
 out for some one in whom they have  
 the fullest confidence.

From this time out work will be  
 pushed with the greatest energy, and  
 the directors hope that within the  
 course of a few months they will be  
 in a position to pay the shareholders  
 their first dividend.

This company certainly looks very  
 promising as far as reports and ac-  
 counts are concerned.

A very considerable amount of de-  
 velopment is done, and the machinery  
 all in place. Another strong  
 feature of the company is that they  
 have such a number of shares in the  
 treasury, namely, 400,000.

As far as can be learned Vancouver  
 people are putting the greatest part of  
 their money into properties in the  
 neighborhood of the Kelley Creek, with  
 the result that mining claims in this  
 neighborhood are held at almost pro-  
 hibitive prices. No doubt this arises  
 because the price asked for the "Golden  
 Cache" stock.

**SAW-BILL LAKE AND HAWK BAY.**

**These Mines Will Soon be Large Gold Pro-**  
**ducers--Directors' Meetings.**

The directors of the Saw-Bill Lake and  
 Hawk Bay Gold Mining Companies being  
 largely the same, advantage was taken  
 to hold meetings on the same date and place,  
 to pass resolutions relative to machinery,  
 and to hear a full report on the progress  
 of these properties.

The Saw-Bill Lake Gold Mining Company  
 have completed all arrangements for the  
 development of one of the best mining plants  
 that have ever been turned out by Messrs.  
 Fraser & Chalmers of Chicago. Fraser &  
 Chalmers are the largest mining machinery  
 builders in the world. The 10-stamp mill will  
 be shipped from Chicago about a month,  
 and will be the most modern and improved  
 mill turned out by this company. All the  
 working parts will be in duplicate. The  
 shoes and dies of the stamps will be of  
 the best quality, and the machinery will be  
 of the old style of cast steel shoes  
 and dies. The stamps will be made of  
 the best material, extra heavy steel-lined,  
 and insured against fire. The stamps of  
 the mill. These mortars weigh nearly 6000  
 pounds apiece, and are the latest approved  
 pattern used in the best plants in the United  
 States. In addition to the mill the plant  
 comprises steam engines, pumps, and  
 conveyers, by which process every particle  
 of the product is saved. The machinery com-  
 pany are only installing a 10-stamp mill

the water, they are putting in power to  
 run a 20-stamp mill. Two boilers will be  
 used, thus insuring a steady running of the  
 mill night and day, barring accidents, as  
 the boiler will be of more than sufficient  
 capacity to fire the machinery.

The company have also purchased a 50-  
 horse dynamo to be used in the mill and  
 camp. An assay office will be erected at  
 once and a first-class assay outfit has  
 been purchased. The ore will be conveyed  
 from the dump at the shaft to the mill  
 building by a cable way, which will have  
 a speed of 300 feet per minute, delivering  
 the ore from the dump to the mill in  
 iron buckets of a capacity of about 1200  
 pounds. This cable way will have a ca-  
 pacity of delivering 20 tons of ore in ten  
 hours, and will be operated by an independ-  
 ent engine.

Another hoisting engine has been pur-  
 chased and another shaft will be sunk upon  
 the property. At present the south drift  
 is being pushed with a view to striking the  
 big reef, which intersects the vein now  
 being developed. It will require about 600  
 feet of drifting along the vein now being  
 developed to reach this. The shaft is down  
 in the neighborhood of 120 feet, and the  
 ore exceedingly rich. Over 125 feet of drift-  
 ing has been done, and the best gold  
 strikes have been made, particulars of  
 which have not been made public, but a  
 new shaft will also be being purchased and  
 will be used in preparing the timber and  
 the mine. At present a large staff is engaged in cut-  
 ting timber for the mill building and other  
 purposes, and it is confidently expected  
 that early in July the best gold will  
 reach the head office of the company.

**PROGRESS AT HAWK BAY.**  
 The report of progress at Hawk Bay was  
 most encouraging in every way, and fully  
 confirms the belief that this property will  
 turn out as rich as Saw-Bill. Four assays  
 of ore, showing no external evidence of free  
 gold, taken from the shaft at Hawk Bay  
 at a depth of 30 feet, showed an average  
 of over \$20 per ton, and greatly exceeded  
 the expectations of the company. The shaft  
 being sunk is a double compartment, 250  
 feet, and has now reached a depth of about  
 50 feet, the ore steadily increasing in rich-  
 ness from top to bottom. The shaft is ad-  
 vanced by experts and prospectors to be one of the  
 most perfect and well drained veins ever  
 seen in the country. It can be traced con-  
 tinuously along the surface for over 5000

feet. The walls are perfectly defined, and  
 about half an inch of iron mud between the  
 vein and the foot wall. The vein has ex-  
 tended over three feet in width from top  
 to bottom, and shows a decided tendency  
 to widen as greater depth is reached.

Mining operations were commenced on  
 this property in September last, and on  
 account of the difficulty in getting in  
 heavy machinery during the summer, the  
 work has been done principally by hand  
 power, and the development has certainly  
 been rapid considering the appliances at  
 hand.

A large amount of machinery will be im-  
 mediately placed on the property. Hoist-  
 ing engines with a capacity of sinking 400  
 feet, two boilers, one for the hoisting en-  
 gines and another to drive the compressor  
 drills, have been purchased and will be  
 erected with all possible despatch. With  
 the aid of the compressor drills much more  
 rapid progress will be made upon this prop-  
 erty than has been made at Saw-Bill, and  
 as it is the intention of the company to  
 sink a 20-stamp mill at this property, work  
 will be vigorously pushed, so that suffi-  
 cient ground will be opened up to give  
 an adequate supply of ore for a mill of  
 this capacity.

In pursuance of the policy adopted by the  
 Hawk Bay Gold Mining Company to keep  
 the stockholders fully informed of the pro-  
 gress of development of this property, the  
 directors were instructed by the stock-  
 holders to send out a complete report of the  
 progress to date and give full particulars  
 as to the operations now being carried on.  
 With a 20-stamp mill, and a capitaliza-  
 tion of \$100,000 this company can doubt-  
 less pay very large dividends.

It is the intention to try and form a syn-  
 dicate to develop the property at the  
 River, probably at Saw-Bill camp. This  
 syndicate would be of great service to the  
 companies and prospectors operating in  
 that vicinity, and would be a large con-  
 venience to people going through the  
 country, as they would be able to rent  
 cars there next summer.

There is a strong probability of the Govern-  
 ment putting in a wagon road from some  
 point on the C.P.R. south to the Seine  
 River in the vicinity of Saw-Bill or Hawk  
 Bay. Something certainly should be done  
 to get the road built, and it would be  
 present the only means of getting in  
 heavy loads is over the ice in winter.

**To Investors**

As the properties of the Colorado Gold  
 Mining and Developing Company show  
 constant and steady improvement, and  
 as the present rate of dividends warrants  
 an advance in the price of the shares,  
 without regard for further improvement,  
 the same will be made on the 12th of  
 January, 1897, and on and after that  
 date no shares will be sold at less than  
 fifty cents per share.

All orders at the present price must  
 show a postmark not later than the 11th  
 instant.

At the price now quoted, with the present  
 rate of dividend, the shares net the  
 investor 15 per cent. per annum,  
 and as the Company's profits warrant an  
 increase in the dividends, it is expected  
 that the February dividend will be  
 double the present amount, and we are  
 warranted in saying that the shares of  
 the Colorado Gold Mining and De-  
 veloping Company are the best invest-  
 ment in the Dominion to-day, and we  
 confidently recommend them to you as  
 such.

Full information regarding the Com-  
 pany's properties and prospects may be  
 had upon application.

Subscription books are now open at the  
 office of Lownsbrough & Co., Bankers  
 and Brokers, 22 King Street East, Tor-  
 onto, Ontario, where J. Grant Lyman,  
 managing director, will be pleased to re-  
 ceive your subscription for the number  
 of shares desired. Price, 40 cents per  
 share, par value \$1.00, full paid and non-  
 assessable, being subject to no further  
 call.

**BLACKSMITHS - ATTENTION!**

We have been frequently asked why we made such a drop  
 in the price of Horse Shoes. Quantity regulates the price in  
 above, and as I dispose of a large quantity at my Guelph, Tor-  
 onto and Northwest houses this entitles me to the largest  
 rebate, and I decided to give the Blacksmith the benefit  
 of this.

**C. KLOEPFER,**  
 44 AND 46 WELLINGTON STREET EAST, TORONTO.

**The CANADIAN GOLD FIELDS**  
 Syndicate  
 Limited, incorporated under the Im-  
 perial Act, 1882.

An Exploration and Mining Syndicate,  
 operating under bond the high-grade  
 Rossland Group of gold-copper prop-  
 erties at Rossland. Owns the Jeanie,  
 a rich silver property in Sicca. Capital-  
 200,000 shares, par value ten  
 cents each. Sold only at par absolute-  
 ly non-assessable. No personal liability.  
 Entire capital stock placed in Treasury.

**HEAD OFFICE--ROSSLAND**  
 HOWARD C. WALTERS, President and  
 Managing Director.  
 JAMES CLARK, Superintendent War  
 Regie Mine, First Vice-President and  
 Auditor.  
 Director, J. C. DREWRY, Secretary-Treasurer.

**BANKERS--Bank of Montreal and Bank of  
 British North America.**  
**SOLICITORS--CLUTE & NELSON, Rossland.**

It is only intended to sell two million  
 shares of the stock at present, that being  
 sufficient to pay for the properties now  
 under bond, equip them with machinery  
 and provide ample working capital. The  
 treasury will not participate in the profits un-  
 til sold; at any time the syndicate to ac-  
 quire other first-class properties. Purchas-  
 ers of syndicate shares (one cent) may  
 participate in the profits of every transac-  
 tion of the company.

**THE SUNBEAM**--Now being actively de-  
 veloped by the Canadian Gold Fields  
 Syndicate Limited--a shaft is down 45  
 feet in pay ore. Five assays made from  
 the shaft show the following results: No. 1,  
 \$24; No. 2, \$22; No. 3, \$20.40; No. 4,  
 \$18; No. 5, \$16. No shaft in the camp  
 gives superior results.

Plans for complete steam hoist, air com-  
 pressor and four-drill plant are under way,  
 and, as soon as equipped, extraction and  
 shipment of pay ore in quantity will be  
 begun.

Subscriptions are now invited for the  
 fully paid non-assessable shares of the  
 Canadian Gold Fields Syndicate, Limited,  
 at ten cents per share. Prospectus on ap-  
 plication. Send orders and remittances

**The Full Money's Worth....**  
 Of value is in all our clothing.  
 A touch of cold weather shows the differ-  
 ence in garments--shows whether they are properly  
 made--well lined and capable of keeping out the  
 cold, and when it comes to the details of making,  
 fitting and style, our clothing is right every time.

**Fine Business Suits \$10.00.**  
 They appear to be equal to suits people pay \$15.00  
 and \$18.00 for. They are equal to them in appear-  
 ance--every thread wool and they are made up  
 and trimmed as well as we can make them--and there  
 is no reason why they should not wear as long or  
 longer than suits you pay \$5.00 or \$8.00 more for.

**Oak Hall**  
 ONE-PRICE CLOTHING,  
 116 to 121 King-St. East,  
 TORONTO.

**A Systematic**

**System**

**Successfully Introduced**

Is that adopted by the Clapp  
 Shoe Company. Each year,  
 in January, when the majority  
 of stores are finding trade dull  
 and are laying off a number of  
 their salespeople, this firm are  
 devising means of keeping all  
 employed.

For several years they have  
 adopted the expedient of send-  
 ing their buyers to the markets  
 and purchasing the travellers'  
 samples of the principal man-  
 ufacturers. These always amount  
 to several thousands of pairs,  
 and include Ladies', Misses',  
 Children's, Men's, Boys' and  
 Youths' Goods. By purchas-  
 ing all they are usually able to  
 secure them at a low price.  
 They have made the rule of  
 selling these at one-half the  
 regular selling price. Although  
 there is not any profit to them  
 in doing this, it has the effect  
 of making trade brisk during  
 what would otherwise be a dull  
 season, and accomplishes the  
 end which they have in view,  
 viz.: The giving employment  
 to their entire staff.

This year they have been  
 more than usually successful.  
 The samples are displayed on  
 tables running the entire length  
 of their store, and seem of  
 themselves an immense stock.  
 That the public are fully alive  
 to the advantages of purchas-  
 ing during this sale is evident  
 by the throng of buyers who  
 are daily in attendance.

**Look Out for Pickpockets.**  
 A pickpocket is in attendance at the  
 week of prayer in the Y.M.C.A., and sev-  
 eral ladies have missed their valuables.  
 Mrs. Pray, mother of Hon. T. M. Day, is  
 one of the victims.

**Harris Convicted.**  
 Richard Harris, an old-timer, was yester-  
 day convicted of stealing in overcoat from  
 Alfred Cornwall, a Yonge-street tailor, and  
 sentence was deferred for a week. The  
 evidence against Michael Sullivan, who  
 had been arrested in connection with  
 the theft.
