

LINABESTOS

Building Board

is the only absolutely fireproof moderate priced building board which can be used as a finished surface with battens for panelled effect, or covered with a thin skim coat of plaster for a perfectly smooth wall or ceiling for papering or tinting.

Linabestos is a combination of Asbestos Fibre and Portland Cement, pinkish-grey in color, made in sheets 3-16 of an inch thick, 42 inches wide, and either 48 or 96 inches long. It can be worked with ordinary carpenters' tools, and nailed direct to the studding.

Linabestos saves much time in building, and makes walls and ceilings that are absolutely fireproof, warm in winter, cool in summer, easily decorated, and that will never crack or fall.

Write for Leaflet No. 7 giving full particulars about this new and better building board.
