

CONTENTS

PART I

GENERAL PATHOLOGY

CHAPTER I

INTRODUCTORY

Cells and Tissues	17
-----------------------------	----

CHAPTER II

THE CAUSES OF DISEASES

Inherited Disease—Intra-uterine Disease—Disease of Postnatal Acquirement— Exogenous Intoxications (non-parasitic)—Exogenic Intoxications (para- sitic)—Parasitic Causes—Endogenous Intoxications, Internal Secretory, Autolysis, and Impaired Metabolism—Predisposition and Susceptibility	58
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----

CHAPTER III

THE MORBID AND REACTIVE PROCESSES

Inflammation—Infection—Thermogenesis and Pyrexia—Fever—Immunity— Pain—Syncope, Shock, and Collapse	115
-----------------------------------------------------------------------------------------------------------------	-----

CHAPTER IV

ON THE MORE IMPORTANT INFECTIONS AND THEIR OUTSTANDING FEATURES

Diseases due to Lower Bacteria—Diseases due to Pathogenic Bacilli— Diseases Associated with Higher Bacteria—Diseases due to Filterable Virus—Diseases Caused by Higher Fungi—Spirochetoses—Diseases Caused by Protozoa	186
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

CHAPTER V

THE REGRESSIVE TISSUE CHANGES

Normal Histolysis—The Degenerations and Infiltrations—Intracellular Fat Accumulations—Calcification and Calcareous Deposits—Pigmentation— Necrosis—Death	259
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

CHAPTER VI

THE PROGRESSIVE TISSUE CHANGES

Overgrowth—Regeneration—Transplantation—Metaplasia and Heteroplasia —The Tumors Proper, Teratomas, Teratoblastomas, and Blastomas— Cysts	301
----------------------------------------------------------------------------------------------------------------------------------------------------------	-----
