

NICHOL'S BOILER SEDIMENT REMOVER.

PATENTED JUNE 28, 1868.

The Subscriber begs to inform manufacturers and others using steam power, that he has invented a new and very useful apparatus to prevent the accumulation of sediment, incrustation, foam, &c., keeping the water thoroughly clean; and being a great saving of fuel, it is also a great preventative of boiler explosions, which we daily read of, and which arises in a great many instances from the accumulation of incrustation, &c. in the bottom of the boilers. It likewise generates much more steam with a smaller quantity of fuel than is generally used, it is also a great saving of time and trouble, as an engine can run night and day for five or ten years, without requiring any delay of stoppage to clean boilers, &c. Every person using steam power should have one, as they are without doubt, the best and most economical and cheapest invention ever brought before the public.

PRICE PER BOILER.

30 inch shell.....	\$30.00	78 " "	70 00
42 " "	36.00	84 " "	80 00
48 " "	40.00	90 " "	90 00
54 " "	43.00	96 " "	100 00
60 " "	45.00	102 " "	165 00
66 " "	50 00	108 " "	110 00
72 " "	60.00		

The subscriber is Agent for the sale of the "EUREKA" SMUT AND SEPARATING MACHINE, also, for the BEST DUTCH ANKER BOLTING CLOTH.
