

The uniting of ingredients, so as secure perfect harmony and contribute an assisting power to each other in their several properties of cure, fulfills one of the most important aims of the chemist.

This is most beautifully illustrated in the **READY RELIEF**—and this is the grand secret of its success—in not only with electrical velocity stopping the most excruciating and agonizing pains, cramps, spasms, aches, and in fact the most distressing agony of *Neuralgia*, and all other pains either inside or outside of man, woman or child,—but cures, with singular rapidity, the most malignant and frightful forms of Asiatic Cholera, Yellow Fever, Small Pox, Diphtheria, and such diseases that strike terror to people when it is known that a visitation of these scourges are threatened. This is claiming great and wonderful merit for this simple remedy; yet we do not claim one jot or tittle more than it has done, and will do. There is no such medicine in vogue as the Ready Relief, for the cure and prevention of the class of diseases it is recommended for.

People who for a quarter of a century have used it, and cured themselves of all kinds of pains, aches, and infirmities, know but very little of its truly great power in the more dangerous diseases. In all cases where an external embrocation or liniment is required, or where there is pain, inflammation congestion—or where there is a disturbance inwardly, such as cramps, spasms, diarrhoea, sickness at stomach, headache and other simple ailments, they know very well that the Ready Relief will remove all these difficulties in a few seconds; but in the more fatal diseases, such as Small Pox, Yellow Fever, Asiatic Cholera, Typhoid Fever, and the class of diseases that terminate fatally in a few hours, they little know that in **RADWAY'S READY RELIEF** they have a life-preserver that will cure them, and protect them against attacks of those fatal diseases, and yet this is true, and it is the only remedial agent in existence that will absolutely CURE AND PREVENT these diseases.

The solution of this great medical problem is plain and simple, for in the **READY RELIEF** we have a Counter-Irritant; a Disinfectant; a Diffusive Stimulant; an Ant-Acid; a Diaphoretic; an Anti-Spasmodic; a Rubefacient; an Anti-Septic; a Sudorific; an Anodyne; a Nervine; and Tonic. Each of these properties are so harmoniously combined and associated that each perform with singular and marvellous rapidity its independent duty, and each, as a part, assists the other; and when the symptoms of disease indicate their united influence, the Ready Relief instantly supplies this important requisite.

In Asiatic Cholera—and the same properties are called for in Yellow Fever, and other malignant malarias—an Anodyne is called for to assuage the pain, stop the vomiting and purging; a Disinfectant, to kill, destroy or neutralize the poison or acid of cholera; an Anti-Spasmodic to allay the spasms and cramps, vomiting and purging; Anti-Septic to prevent mortification and to purify the gases of the stomach; Diffusive Stimulant, to impart warmth throughout the chilled and cold body—and arouse the paralyzed organs, the functions of which have been stopped, and to start the congested blood in circulation; Counter-Irritant, to withdraw inflammation from the engorged blood vessels and congested nerves and impart to the nervous system a new supply of electricity; a Diaphoretic, to arouse the sluggish vessels of the skin in the secretion and promotion of perspiration; these indications being accomplished, a cure is effected, and in ninety-nine times out of a hundred, the most violent cases of Asiatic Cholera are cured by the simple use of **RADWAY'S READY RELIEF**.

This same principle secures the same happy results, in all other diseases and ailments, either applied externally or taken internally.

In Congestion of the Lungs, Inflammation of the Bowels, Bilious Cholc, Neuralgia, Rheumatism, Inflammation of the Bladder and Kidneys—in fact,
