

It is quite certain that this is a pipe. It is constructed on the same plan as Fig. 26, but with much better effect. It is made of a fine-grained sandstone. The disc is three inches and a half in diameter, comparatively thin, and the bowl is detached from the disc

FIG. 26.

except in the centre, where it communicates with the large stem-hole from the opposite side, as seen in Fig. 25. The lower half of the bowl-piece is wholly ornamental, and it is noticeable how nearly the design corresponds with the lower end of Fig. 26; the one however, belonging to the bowl and the other to the disc. At the edge of Fig. 25, just above the mouth of the bowl, is a small hole, as if for suspension, and this probably was the way it was carried, serving, no doubt as a bit of personal decoration when not otherwise in use. This beautiful and unique object was found by Mr. James Cluness, on his farm in the township of West Williams.

Fig. 27.

The tastefulness of design and treatment of subject in Fig. 27, are suggestive of an aboriginal Michael Angelo. The material of which this pipe is composed, is a hard, compac
