

CANNOT BEAT THE "ALPHA" IN A FAIR TEST.

FROM
MATTHEW MOODY & SONS

(Factory and Head Office, Terrebonne, P.Q.)
MANUFACTURERS OF

Rakes, Mowers, Reapers, Binders, Threshing Machines, Ensilage Cutters, etc., etc.

Terrebonne, July 16, 1900,
I, the undersigned, Geo. Belanger, manager for M. Moody & Sons, have bought for Mr. Henry Moody's account two (2) Alpha No. 1 Separators, from The Canadian Dairy Supply Co., after a test of the Alpha De Laval Separator against the "U.S." machine, held on the 10th and 11th of July. In the results obtained by both tests of machines, the difference was large enough to warrant me buying the two Alpha Separators, and I recommend all butter makers thinking of purchasing a Separator to get an Alpha, as no other will give such satisfaction from the work.
[Signed] G. W. BELANGER, Mgr.

Terrebonne, January 5, 1901,
GENTLEMEN:
Yours of the 2nd inst. to hand. The two Alpha Separators which we bought from you during the past season have been in constant use and have given us every satisfaction both as to their capacity and as to the quality and quantity of product.

Yours truly,
M. MOODY & SONS.

THE TEST.

Here are the results of the test, under Inspector Corbeil's Supervision:

	10th July, 1900 U.S. Separator No. 1	11th July, 1900 ALPHA No. 1
Milk received.....	9446 lbs.	9571 lbs.
Average temperature.....	72 Deg. F.	72 Deg. F.
Per cent. of fat in milk.....	3.80 %	3.80 %
Duration of skimming.....	3 hrs. 50 min.	2 hrs. 50 min
Amount skimmed per hour.....	2464 lbs.	3378 lbs.
Speed of Separator.....	7800 Revolutions.	6400 Revolutions.
Average fat left in skim milk, samples taken every 15 minutes.....	0.07	0.03

THE CONCLUSION.

Butter Fat saved by the Alpha on 9571 lbs. milk, as compared to the U.S. performance... 3 83/100 lbs.
Equal to finished Butter: 4 40/100 lbs.
Also saved by the Alpha, as compared to additional time occupied by the run of the U.S.:—
a. Power, oil, wear and tear, attendance, Patron's time, waiting outside the door, spoilt quality of milk..... One hour.
b. Power, 50%, less than with the U.S. during 2hrs., 50 minutes, equal to..... 85 minutes.
And this economy will be a daily occurrence during the lifetime of the Alpha, and will be increased as the season advances and milk is harder to skim.

ENSILAGE SEED CORN

THE YIELD IS WHAT COUNTS

Mammoth Southern.
Giant Prolific.
Yellow Dent.
Leaning Yellow—early maturing.
White Cap Yellow Dent—early maturing.
Red Cob White.

Read the yield from one who has tried our Mammoth Southern, and knows what it is. Don't let your dealer catch you with some cheap job's variety by that name. Get the **PURE** article—take no other. Write us if your dealer does not keep ours, and we will tell you where to get it pure. "Blood will tell."

E. R. ULRICH & SONS,
Springfield, Illinois, U.S.A.

Messrs. E. R. ULRICH & SONS, Springfield, Ill. Gentlemen,—I used to buy seed corn from you several years ago, and it was always good, and gave me great crops, 20 to 24 tons to the acre, but late years I have bought my seed corn from a dealer that good, sound, Mammoth Southern Sweet Corn hat I used to buy from you? If so, what would it cost me per bushel, delivered in Bond; and have you some good earlier varieties that you can recommend as large yielders of ensilage? We like some earlier that will mature for ensilage. Earlier varieties make richer and sweeter silage, but not so much of it to the acre. I grow 60 acres for silage. Yours truly,
E. E. TILLSON.

Giant Prolific yielded on Government Farm, Agassiz, B.C., summer of 1898, 38 tons and 450 lbs. on one acre.
