#### LAPSES: EXPENSIVE AND HAZARDOUS.

The life agent cannot be too well primed in arguments designed to meet the policyholder who shows signs of a desire to lapse his policy. He must point out that the lapse of a life insurance policy is expensive to the insured and hazardous for his family. The insured cannot drop a policy with the intention of renewing later, or drop a policy in order to take a policy in another company, without losing a considerable part of what he has paid, paying more for the new than he has paid for the old, and incurring the hazard of death and becoming uninsurable in addition.

If the insured is dissatisfied with the form of his policy he should bring his troubles to the attention of the company. The worst thing he can do is to lapse his policy and take out insurance in another company without first finding out what the original company will do, for the reason that the original company has on hand certain accumulations resulting from the payment of past premiums which can be used to the insured's advantage in making the change desired. The insured might lose these credits to a large extent by entering into negotiation with another company. In other words, the holder of a policy can invariably do better with his original company than by attempting to cancel his policy outright and to substitute insurance in

another company. Any new policy he takes out costs more on account of his increase in age. If he takes another policy of the same kind he will have to pay more than he paid for the policy he lapsed, and every year of delay in taking out a new policy means a further increase in the cost.

It is also pointed out by the Travelers of Hartford, which has lately been concerning itself with the education of its policyholders along these lines, that an element fraught with most serious consequences is the combined chance of death and uninsurability. Of 85,441 men living at age thirty 7,335 will have died before age forty, and the percentage of deaths increases every year. Equally serious is the chance of becoming uninsurable.
Approximately one in every fourteen applicants is rejected for life insurance. Every year a certain number of men who were physically fit a few months before become uninsurable, and the number inereases with age.

#### PHOENIX ASSURANCE COMPANY OF LONDON.

The directors of the Phoenix Assurance Company, of London, England, on hearing of the Halifax disaster, cabled instructions for a contribution of \$5,000 to be made for purposes of relief, on behalf of the Phoenix and its subsidiary, the Acadia Fire Insurance Company.

Cables state that the Union Marine Insurance Company, of Liverpool, which is owned by the Phoenix Assurance Company, is acquiring the Northern Maritime Insurance Company, of Newcastle-on-Tyne.

Four thousand two hundred men are employed by Canadian municipalities in waiting for fires to occur and then attempting to extinguish them. The cost of this service exceeds \$4,000,000 a year.
