Princess Cream Separators

The reputation of British machinery for DURABILITY and superior construction is world-wide; and Scottish engineers occupy the front rank.

Watson, Laidlaw & Co., of Glasgow, the makers of the Princess and Princess Victoria Separators, are no novices. They have been making centrifugal machines, of which the Cream Separator is a development, for upwards of THIRTY YEARS.

These Separators are acknowledged to be the EASIEST DRIVEN of any machines, and can be WORKED BY A BOY or GIRL. Notwithstanding the EASE OF DRIVING and LIGHTNESS OF RUNNING, owing to their SIMPLICITY OF CONSTRUCTION, SUPERIOR QUALITY OF MATERIAL USED, and EXCELLENCE OF WORKMANSHIP, their DURABILITY is UNSURPASSED and the cost of REPAIRS practically nothing. NO SEPARATOR SKIMS CLEANER. NONE SO EASILY CLEANED. NO LOOSE TRAYS. NO EXPOSED GEARING, BELTS OR CORDS. MADE IN SIX SIZES, STANDS INCLUDED.
