Toronto

Concrete Mixers and Brick Machines

We manufacture concrete mixers in all sizes to suit the contractor, in-
cluding hand mixers and power mixers of all sizes, run by steam, gasoline
or electric power. Our improved mixer gives you a batch in thirty seconds.

Cement Brick Machines

YOU can use fine gravel and crushed stone with our machine as it
polishes the face of the brick, and therefore brings the cement to the
face of the brick, thus assuring a much stronger brick in the face.
