A HARD DRY COUGH.

Mr. J. L. Purdy, Millvale, N.S.,

writes:-"I have been troubled with a

hard, dry cough for a long time, especial-

ly at night, but after having used Dr.

Wood's Nerway Pine Syrup, for a few

weeks, I find my cough has left me. To

any person, suffering as I did, I can cay

that this remedy is well worth a trial. I

would not be without it in the house."

QUESTIONS AND ANSWERS. Miscellaneous.

A BREEDING CRATE.

Ans .- A breeding crate is made much the same as a shipping crate, closed in small sows, it is well to have a false, or second front, to slip down between cleats, to shorten the box when used for small wide and 2 feet 9 inches high. The footrests for the boar may be a 2 x 4-inch strip attached to the forward end of crate on each side, about where the sow's head comes, and extending to the rear and bottom, where it is fastened. When necessary, when breeding a large sow to a small boar, it is well to have a movable platform about six inches high, to

KILLING PEA WEEVIL

What is the formula for treating seed

This should have been attended to as soon as they were threshed, but may be done at any time when the temperature is above freezing. The whole crop should be thus treated, or else enclosed in tight sacks, and ground as soon as fit. However, at this date, the best you can do is to treat your seed. A convenient way to fumigate a small quantity is as follows: Take an ordinary coal-oil barrel holding about five bushels, fill it with peas, and pour over it right on to the peas, about three ounces of bisulphide of carbon. Close the top tightly. This may be done with fine sacks, dampened and laid smoothly on the top with weighted boards on top. The bisulphide should be of the best quality, which will vaporize readily, and the exposure should be for 48 hours. As the vapor is very inflammable, the work should be done at a distance from the buildings, and no lantern or other light brought near. Where larger lots are to be treated, the peas may be put in a tight bin of about 20 bushels capacity, and a pound of bisulphide set in a dish on top of the peas, the whole being then covered. When very large quantities are treated in speciallyprepared houses, a pound will suffice for 100 bushels, there being less waste of the vapor during the necessary exposure of

Which is the best way to drain the foundation of a basement barn so as to also to keep the foundation of the dry? I am building on the side of a hill; the bank will be about four feet high on one side. Will it be better to dig a tile outside the wall, from which a drain

Kindly let me know how to make a breeding crate. I am keeping a good boar, and there are many small sows coming to him that are not strong enough to hold him. N. K. W.

front and open behind and at top, with a bar to slip behind the sow, above the hocks, to prevent her backing out. In order to accommodate both large and sows. A good size is 5 feet long, 2 feet place behind the crate; this should have cross cleats to prevent slipping.

peas to kill bugs, or pea weevil?

Ans.-Fumigate with carbon bisulphide.

FOUNDATION FOR BARN WALL.

avoid the frost heaving the walls, and ditch under the walls three feet deep and fill with small stones, or to drain it with will be cut for an outlet, as I have about 30 feet of fall by which I can drain the foundation?

Glengarry Co., Ont.

Ans.—So long as the wall foundation is below the frost line it will not be necessary to dig the trench to be filled with small stones more than a foot or eighteen inches deep. In fact, unless our inquirer has a quantity of small field stones that he wishes to be rid of, we doubt the advantage of using field stone at all. While we cannot advise with the same confidence for conditions with the climate of Glengarry County, if we were answering this question for Middlesex, we would recommend our querist to dig out the excavation six inches or a foot farther back than where the outside face of the wall will come, and along the outside of this excavation lay a row of tile, sunk so that the top of the tile will be not higher than the bottom of the first course of stone. Then point up the outside of the wall as it is laid to lessen the chances of water seeping through, and fill in between the wall and face of excavation with a little gravel at the bottom and earth or anything handy above that.

I Can Make a Man of You

Men who want to regain the vigor of youth, who want to attain the highest standard of physical vitality, can do so by wearing

Dr. McLaughlin's Electric Belt

You will never know what a grand power electricity is until you feel its genial, glowing warmth penetrating every vital part of your body from my

You know how easily electricity runs street cars, makes plants grow witht sun or soil, purifies filthy water and transforms night into day at the will of man, but I can't make you believe it will renew the vigor of youth until you feel it dancing through your veins and carrying to every organ of your

body the "fire of life." Pick out the men who have worn my Belt. See them with head erect, chest expanded, the glow of health in their cheeks, courage in their hearts, and a clasp of the hand that tells you, "I am a man."

"Your Belt is far superior to any remedy that has ever been developed by medical science for the treatment of nervous debility and lost vitality."-MR. ANDREW W. LONGFORD, Stratford, Ont.

And how is it with you? Have you rheumatism and back pains, a dull ache and weakness over your kidneys, dull headaches, with a tired, stupid feeling? Are you losing your vitality? Do you feel yourself growing aged before your time? Are you nervous, sleepless, short of memory, and lacking in spirit and self-confidence? Do you know that you are not the man you would like to be?

If so, I can cure you. What you lack is just what electricity supplies. My Belt will cure you, and if you will come to me you will soon be one of "DR. McLAUGHLIN'S MEN."

What more can you ask? I am willing to take all the chances of curing your case, and if I fail you will have the satisfaction of knowing that one of the best and strongest electric appliances in the world has failed. All you lose is your time. My confidence in my method enables me to offer any man or woman who will secure me, the use of my Belt, at my risk, and

PAY WHEN CURED
