# Make Yours a Warm House by Installing a McClary's Sunshine Furnace

The most important factor governing the comfort of a house, is the heating system.

No amount of exterior beauty or interior decoration will ever make up for the shortcomings of a defective furnace. A cold house is not worthy of the name of "home".

The average man, unacquainted with the science of house heating is apt to feel bewildered and quite helpless when it comes to making a final decision regarding the best system to adopt.

For efficiency, economy, safety and comfort there is no heating system to compare with the warm air method as represented by McClary's Sunshine Furnace. Thousands of owners have proved this to their complete satisfaction.

Furnish us with plans and size of your house and we will have our heating experts figure out for you the size of furnace necessary, location and other arrangements that will ensure best results, all without any charge whatever to you.

Write our nearest branch for the "Sunshine" booklet--full of information and free on request.
