The stove we are noticing appears admirably adapted for the purpose intended, and we have no so doubt that Mr. Ruttan will have many orders now that his store has been brought prominently under the notice of the public. An enormous quantity of Canadian Manufactured leather was displayed, and appeared to be an excellent article. Some very good harness was also on view, and a few Saddles. FERGUS FAIR .- Our readers in Nichel do not, we suppose, require to be reminded that Friday next, is the day of the Nichol Branch of the Agricultural Society's Exhibition of Live Stock, and of the Annual Pair at Fergus.

TEMPERANCE SOCIETY .- The Society opened their New Hall on Friday last, when the attendance was larger than the accommodation, many having to leave for want of room. A number of names were added to the roll. We understand the Society have invited the celebrated Air Gough, now in Montreal, to deliver two Lectures in Guelch, and that he is expected to be here in about four wasks.

Public Roads .- A meeting of the Cohncil of the United Counties of Wentworth and Halton, was called by the Warden for Friday last, to take into consideration the propriety of renewing negociations with the Inspector General for the purchase of the Dundas and Waterloo Rond, and the Hamilton and Brantford Road, to the County line including the Brantford Bridge; and also to take into consideration the offer, by the Commissioners of Public Works, dated 26th August, of the road between Hamilton and Caledonia Bridge, lucluding the latter. There was not a sufficient number of members piesent to constitute a quorum, the Warden notwithstanding read certain correspondence that had passed between him and Government officials, from which, says the Hamilton Gazette, the Public will per den has been zealously but fruitlessly calling the attention of Government to the sale of these roads, and that not the slightest satisfactory information can be obtained. The whole business of these roads

has been mismanaged by the Government from first to last, and it is some satisfaction to know upon whom rests the entire responsibility. The matter remains, of course, at present in abeyance, until it suits Mr Hinck's pleasure to return to his duties, which, ever since the proregation of Parliament, he has most shamefully neglected.

THE ORION - Readers will probably remember the wreck of the steamer Orion. between Liverpool and Glasgow, with lamentable loss of human life. The captain, Thomas Henderson, and second mate, John Williams, have been tried and found guilty, the former of " culpable neglect of duty," the latter of " culpable and reckless neglect of duty." Henderson has been sentenced to eighteen months imprisonment, and Williams to seven years transportation.
