A TROUT STORY.

Most travellers carry medals for telling fish stories, but here is one which is a little off the common run. We were camping in the north, says a man of the road, and one evening after our supper of black bass and bacon we lay under the pine trees smoking and telling fish stories in which it was always the "bigger bass" that got away. The guide listened with the gravity of a man who knew all about fish stories, and finally he knocked the ashes from his pipe and told us a fish story. "Once long ago," he said, "there was a terrible big trout up in Smith's pool. Every fellow who fished in the pool had hooked him one time or other, but he always got away, bit off the snood or something. I tried to catch him myself a dozen times. One day I was sitting by the pool, when splash, a young robin fluttered out of a nest on a limb above the pool into the water below. In a minute there was a rush, a gleam of yellow, and the old trout had thrown himself clean out of the water, and had swallowed the robin whole. What did I do? Well, I climbed that tree in short order. Got another one of those young robins, baited my hook with it, and threw it in just as lightly as I could. In a minute there was another rush, another gleam of yellow, and again the old trout jumped clear out of the water as he swallowed the robin, and in a minute I had him hooked. It was lucky I wasn't fishing with any of this new-fangled rigging these boys use, and that I wasn't bothered with a reel to look after, or I would have lost him sure. As it was, it took me a devil of a time to get him out. Good to eat! Great Scott! We didn't try to eat him. He was so full of hooks we sold him for old iron, you know." That ended our fish stories for that night.

MOOSE RECORD BROKEN.

Dr. W. L. Munro, of Providence,

R. I., came out on Thursday from a

three weeks' hunting trip to the head-

waters of Nepisiquit. He shot a

moose with the enormous antler spread

of 68 1-4 inches, breaking all records

for New Brunswick. The doctor

took his trophy to Fredericton with

him and is naturally proud of it. He

shot the animal ten days ago after it

had been called up by his guide, Chas.

Cremers, of Scotch Lake. The best

previous record for a moose head

taken in this province was 67 1-2 in-

ches. E. C. Russell, the English

sportsman, who has been hunting at

Cremers camp, shot a moose with an

antler spread of 61 inches.

THOUSANDS OF WOMEN TORTURED

BY BLINDING HEADACHES.

Who Could Be Well, and Happy, and Free of Pain.

Headaches simply mean poisoned blood. The human body is constantly decaying and being renewed. Dead matter is absorbed by the blood, and should be taken from the blood by the kidneys, bowels and skin and passed out of the system. If one of these organs does not act properly, the blood becomes impure—it is full of poisons.

When there are constant headaches, it is always found that the bowels are irregular, the kidneys weak, or the skin sluggish, pale or sallow. The blood is full of poisons, and the host of "headache powders" is useless. They relieve for the moment, but they clog the system and do harm. They never reach the seat of the trouble, they cannot purify the blood.

"Fruit-a-lives" completely cure Headaches. They stimulate the liver and make the bowels move regularly. They regulate the kidneys. They induce healthy skin action. Thus, all the waste matter—body poisons—are taken out of the blood and there is nothing to cause headaches. "Fruit-a-lives" are the only remedy that really cures.

"Fruit-a-lives" are fresh fruit juices—in which the medicinal action is greatly increased by the special way in which they are combined. 50c a box; 6 for \$2.50. At all druggists' or sent on receipt of price.

Salvation Army Immigration

Department Charter Ten

Ships for 1907.

The Salvation Army has just closed a very successful year of immigration work, having brought out seventeen thousand settlers to Canada, but seeing that this amount was very far short of the demand for farm help and laborers of various kinds, they have decided to bring out this year, at least twenty-five thousand for agricultural and other purposes.

Small parties will arrive on all regular boats of the Allan, Dominion and C. P. R. lines from the middle of November up to February, followed by ten chartered steamers carrying fifteen hundred each, and special conducted parties on all regular boats up to the last of April.

Staff-Captain Jennings who represents the work for the maritime provinces, is anxious, that all who need help should be supplied while the immigrants are landing at Halifax and St. John, as it is very difficult to get them to come down this way after the boats land at Quebec.

Last year a number of applications were not filled owing to the fact that some farmers delayed the matter until late in the season; those who will need laborers this winter or in the coming spring, should apply now, stating the date men will be required. This would prevent them having to wait a long time or being disappointed altogether.

Application forms can be secured at any time by applying to STAFF CAPTAIN JENNINGS, Box 477, Halifax, N. S.

STAVERT—MOASE.

The residence of Rev. L. A. Mc-

Lean, 14 Richmond street, St. John,

was the scene of a very pretty

but quiet wedding on Wednesday

afternoon, Oct. 30, at 4.30 p. m.,

when Robert A. Stavert, of Wil-

mot Valley (P. E. I.), was united

in marriage to Miss Lucy Alma

Moase, of Kensington (P. E. I.).

The ceremony was performed

by Rev. R. Hensley Stavert, of

Harcourt, cousin of the groom.

The bride was given away by

her father, Robert T. Moase, of

Kensington. The young couple

were unattended. The bride was

becomingly dressed in white.

Her traveling suit was a stylish

light brown with hat to match.

The young couple left on Thurs-

day for their future home in Wil-

mot Valley.

"What," asked the very young

man, "is the real struggle of man-

kind?"

"The real struggle of two-thirds

of mankind," replied the home-

grown philosopher, "is to get a

square meal, and then wonder

where the next one is coming

from."

GREAT LOSS TO I. C. R.

Campbellton Freight Sheds Burned

on Friday Morning.—Loss

Was \$30,000.

Campbellton, Nov. 1.—A most

disastrous fire broke out shortly

after midnight this morning in the

freight shed owned by the I. C. R.,

and in a very few minutes \$30,000

worth of property had gone up in

smoke. Nothing is left this morn-

ing but a heap of smoking ruins.

The origin of the fire is unknown,

but it is thought that a burning

cigar or a fire cracker may have

been responsible. The fire started

in the centre of the freight shed

and in five minutes' time the whole

shed was in flames. The oil in the

shed contributed to the rapid

spread of the fire. The hose cart

arrived about fifteen minutes after

the fire was discovered and rendered

valuable assistance in prevent-

ing the flames from spreading.

The yard was filled with cars and

the yardmaster had a very difficult

task to save the cars. As it was

three were badly damaged. On

account of the holiday no freight

was delivered and as a consequence

the shed was full of goods. There

are very few merchants in town,

who have not lost something.
