CO-OPERATION
IN THE SCHOOL

If the school is to accomplish anything more than the transmission of technical knowledge of one generation to another; the existing attitude of indifference towards the child's education must give way to the realization that the visit of the parent to the school is an opportunity. Mrs. Edith E. Bristol; dean of girls at Soldan High School; St. Louis told members of the National Association of Deans of Women in convention at Chicago.

"Educators alone cannot direct the mind of the child in the proper channels technically and socially," Mrs. Bristol said. "We must realize that pre-occupation with school affairs tends to keep us from envisaging the community which we serve. Our teaching of single subjects endangers the main object of education rearing well informed and useful citizens to carry on the world's affairs. If we can see the futility of too much faith in our single handed method we shall make use of the criticisms expressed by parents to build up a better mutual understanding and to encourage democratic participation in community life."

Mrs. Bristol urged more visits by parents and an active interest in school life both educationally and socially.

"The teachers need the suggestions furnished by the parents as much as the parents need them to give the child a technical education. The dean can be the connecting link between the teacher and the parent and on her depends the success of the school. To bring fruitful relations between the school and community which results in raising the standards of civilization among the younger generation is one of the many problems confronting educators."

"We have lost sight of the fact that without close co-operation between the school and community the results cannot be obtained in advancing civilization."

If a frequent interchange of opinions could take place between the school and the community the parent and teacher the best results would not be gained in advancing civilization.

If a frequent interchange of opinions could take place between the school and the community through participation on the part of students in a democratic management of school affairs and through a similar organization of parents and teachers we should not be laboring under misunderstanding."

The Syntax of To-Day

I don't suppose that many of us can recall from our school days the correct definition of syntax; but the pronunciation of the word is a synonym for the taxes we pay to day—we are just sinful of taxes.

1. Customs Tax on everything
2. Income Tax.
3. Profit Tax.
4. Property Tax.
5. Motor Car Tax.
6. Dog Tax.
7. School Tax.
8. Local Improvement Tax.
9. Gasoline Tax.
10. Amusement Tax.
11. Cheque Tax.
12. Receipt Tax.
13. Race Gambling Tax.
14. Radio Tax.
15. Electric Tax.
16. Deed and Law Stamp Tax.
17. Surtax.
18. Sales Tax.
19. Railway Ticket Tax
20. Succession Duties Tax.

Wonder what they would have done to the tax gatherers in the good old days of yore when kings were benighted for imposing less burdens upon the thrifty folk.

I have paid all these taxes except the twentieth. And if the various governments—Federal, Provincial and Municipal—do not study economy few of us will ever have to pay that

Canada Leases London Office For 100 Years

An announcement regarding the purchase of the new Canadian offices in London was made in the House of Commons by Hon. J. H. King Minister of Public Works. The Government has secured through the high commissioner the Union Club Building at the corner of Cockspur St. and Trafalgar Square. The freehold belongs to the Crown but the Canadian Government has secured a lease for 100 years. The ground rental is to be £2'850 and the Canadian Government is paying £225'000 to the present holders of the lease

for their rights; including the facing of the building with stone in place of the present facing of stucco or brick.

WHAT ATTRACTS IMMIGRATION

With low-priced farm lands and heavy yields of grain in Alberta this year some farmers have been able to accomplish wonders in ways of financing their farms. William Bros. of Consort purchased a farm in the fall of 1921 which they pre-

for a car, without knowing what the leader offers in the fine-car field

WE made a canvass of many who bought rivals of Studebakers. We said, "Tell us why you liked your car the better." The majority said, "We did not even look at the Studebaker." Most of them bought new models of the car they owned before.

Yet Studebaker is a leader in the fine-car field today. Studebaker builds more quality cars than any other plant in the world. Last year, 145,167 fine-car buyers paid \$201,000,000 for Studebaker cars. Nearly three times as many as in 1920.

Is it fair to yourself—or fair to us—not to learn the reasons for this trend?

Facts to consider
Studebaker assets are \$90,000,000—all staked on satisfying, better than others, buyers of high-grade cars. \$50,000,000 in modern plants and equipment, of which \$32,000,000 has been added during the past five years. \$10,000,000 in body plants to give you superlative beauty. 125 experts who devote their whole time to studying betterments.

Consider Studebaker history. For 72 years this concern has stood for high principles and policies. For two generations, against all the world, it held first place in horse-drawn vehicles. Now for years its name and fame have been committed to like attainments in fine motor cars.

If you only know
There is no room here for details and comparisons. You will find them all in Studebaker show-rooms. But let us cite some significant facts.
