## A Problem in Arithmetic.

By RUTH CAMERON.

RUTH CAMERON

If one did all the things that one ought to do for the good of one's body and mind and soul, what time would one have left just to live? None, I think. An article which assured its readers that they ought to be able to do two hours serious reading a day, started me thinking on this subject. Two hours isn't much out of the twenty-four, is it? But just try to recall some of the other purposes to which enthusiasts on one subject or another assure one that one should easily be able to devote ten minutes, a half hour, two hours.

At Least Three Hours For Outdoor Exercise.

For instance, a health expert declares, in an article on outdoor exercise, that no one can be really healthy unless he spends at least three hours in outdoor exercise. And that the three hours may be wholly given over to his hobby, he takes pains to assure you that walking to and from one's work, or any other form of exercise, which is incidental to daily work, shouldn't be included. The three hours must be spent strictly in some form of perfectly useless exercise to be of any use.

Cleaning One's Teeth Five Times A Day Takes Some Time.

Of course everyone knows how that one should clean one's teeth at least five times a day (one dentist assures me this involves the possession of three toothbrushes which should be used in proper rotation and carefully rinsed and aired between each using). Another health expert complains that we do not spend enough time at our meals. Each meal, he insists, one should spend a full hour at the table, first chewing every morsel of food properly and then sitting still and conversing over the coffee or tea cups while the meal digests.

And One Must Relax For Half An Hour.

Then there is the relaxation enthusiast who promises you a speedy old age unless at least half an hour (preferably an hour) is spent some time in the day just relaxing. If one is a woman, the care of the complexion and hair and nails should, unless one is a slattern (so says the beauty expert), consume at the very least, an hour a day.

This is to certify that I have used MINARD'S LINIMENT in my family for years, and consider it the best liniment on the market. I have found it excellent for horse flesh.

(Signed) W. S. PINO, "Woodlands," Middleton, N. S.

## Milady's Boudoir

### ERADICATING WRINKLES.

You can eradicate wrinkles by systematic massage. It should not be hard for a woman to remove all traces of them, but the treatments must be very regular or they will return again.

Every night apply hot cloths to your face until the pores are well opened. Then cover the skin with good cold cream and you are ready to begin. First massage the muscles of the cheek just in front of the upper half of the ear, using the three fingers of both hands. Rub outward and upward in a circular manner, with a firm yet gentle touch, covering a spot about the size of a silver dollar.

The upward motion will null the skin taut about the corners of the mouth, pulling out the drooping line at the side of the nose. If the face is heavily lined here, massage will, in time, so strengthen the muscles that the furrows will be much softer or disappear entirely. Repeat the same circular motion at the corners of the mouth.

Next massage the temple muscle in the same way. The regular and sys-

## New York-- Its Greatness.

The National Geographical Magazine for July devotes an elaborate article to an illustration of the "bigness" of the City of New York, which it calls the "Metropolis of Mankind."

1st--The exports passing out of its harbor last year had a greater value than the combined exports of Asia, Africa and Australia.

2nd--The imports coming through its custom lines exceeded in value those of the continents of South America, Africa and Australia.

3rd--In population it outranks any one of half the nations of the earth. Surpasses that of the entire continent of Australia, and matches the combined strength of the six Westernmost States of the American Union.

4th--In annual expenditures it exceeds all except seven of the fifty odd nations on the map.

5th--Its water system could supply the whole earth with drinking water, and its storage reservoirs hold enough to slake civilization's thirst for more than a year.

6th--Its electric transportation lines carry nearly twice as many passengers in twelve months as all the steam railroads of the United States. Some 300,000 passengers arrive and depart through the city's railway stations daily.

7th--Who reckons a dime? Yet the world's loftiest building, its crowning cathedral of commerce, was built out of the small margin of profit in ten cent transactions. (Woolworth's 735 feet high building with its 40 acres of floor space and two miles of elevator shafts.)

8th--Who considers the dust in the street? New York has built up 65 acres of ground, valued at several million dollars, out of street sweepings.

9th--Over seven tons of dust and dirt are carried by tramping feet into the subway every twenty-four hours.

10th--It has more Irish and their sons and daughters than Dublin, more Italians and their children than Rome, as many Germans and their children as Leipzig and Frankfurt-on-Main together, while its Russian population by birth and parentage is greater than the combined populations of Riga and Dvinsk. Seven out of every nine children of schools, etc., are of immigrant parentage.

11th--If every resident whose parents were born in America were to leave the city, its standing as the second most populous centre in the world, would not be affected.

12th--The immigrants and their children resident in New York are almost equal to the combined populations of Paris and Philadelphia, and greater than the combined population of Chicago and Berlin.

13th--Its vast proportions in everything relating to life will be seen from these facts. Two transients arrive every second, a passenger train comes into the terminals every twenty-two minutes, and a ship clears every forty minutes. A child is born every six minutes, a wedding takes place every thirteen minutes, and a funeral is held every fourteen minutes. There is a real estate transfer every twenty-five minutes, a new building is erected every fifty-one minutes, and a fire occurs every thirty minutes. Every day 350 people come to the city to live, and a hundred new telephones are installed.

14th--Giant electric pumps which can deliver 30,000 gallons of water a minute at a pressure of 200 pounds to the square inch represent its "big guns" of the fire department. Ten pumps of high pressure service can deliver 100 streams at once. The average number of fires per day is forty. These rarely get beyond the buildings in which they occur.

15th--Three people out of every four in the city were born under alien flags, or are the children of foreign-born, and nearly 4,000,000 live in tenements and apartment houses.

16th--The food and drink bill of the hotels and restaurants amounts every night to more than a million dollars. One hotel, reported to be the largest in the world, has 1,700 rooms.

17th--Its death rate in 1916 was but 13.80 per thousand. There were proportionately only half as many deaths from pulmonary tuberculosis in the decade from 1906 to 1915 inclusive as there were from 1876 to 1885, and only one-third as many deaths from typhoid, one-fifth as many from diphtheria, one-sixth as many from scarlet fever, and only half as many deaths of babies under one year of age, and this despite the density of the population on the East side.

18th--Its population approaches six millions, and every week these consume 200 train loads of food, 5,100 carloads of milk, 1,636 carloads of vegetables and 1,168 carloads of meat dressed and on the hoof. New York's weekly supply requires a train seventy-six miles long and 200 engines to draw it.

19th--Its amusements, upon which it spends \$60,000,000 a year, are a story in themselves; one theatre alone earned \$1,500,000 in box office receipts.

Finally, its water supply, its enormous cost, the difficulties encountered in its construction, the transcendent genius, untiring industry and patience which designed it and carried it to successful completion are well adapted to excite the admiration of the world at large.

It has an annual budget of \$200,000,000, and spends more for municipal purposes than Canada spends for Dominion purposes in peace times.

CLOSER TOGETHER.

Since our dad died at Valley Forge, before they'd be submittin' to that old bonehead German George who then was ruling Britain, a sort of coldness has obtained between two mighty nations; our bonds of friendship all were strained, though we were blood relations. It took another German king (with soul for war expanding) between these mighty realms to bring the perfect understanding. Our banner floats o'er English domes, the common foe deifying; and over countless Yankee homes the British flag is flying. 'Tis soreness that one time we knew the German kaiser smother; our friendship's sealed with blood, and true and we are close as brothers. We sing with them, "God Save the King," and raise our glad kyoodle; and they will make the rafters ring with good old "Yankee Doodle." Britannia rules the waves, you bet, and o'er that heaving ocean we stretch our hands, already yet, with brotherly emotion. When Kaiser Bill has quit the fray, brought down by stress of weather, he'll look at Brit and Yank and say, "I brought the two together!" And that will be the sourest pill, the nicest does of bitters, that e'er went down old Kaiser Bill or other kingly critters!

## British Success in Palestine

British Make Prisoners 120 Guns. Bulgarian Haig's Men Smash

### WAR REVIEW.

With the violence of the operations on the Western front in France considerably diminished in intensity, the Turks in Palestine and the Bulgarians and their Allies in Macedonia are being put to the test, but nowhere thus far have they been able to hold back or even to counter attack the onslaughts of their foe. In Palestine the Turks seemingly are in process of being crushed. In Macedonia the Entente forces are driving sharp wedges of considerable distances into the enemy's flanks. In France and Flanders where there has been any fighting rising in importance above patrol encounters, the British, French and American troops have kept the upper hand and advanced their respective lines. Of transcendent interest for the moment at least are the operations of the British General Allenby's forces in Palestine. Here in less than four days the British have swept forward in the centre across the River Jordan and taken the famous city of Nazareth, while their wings closed round in a swift enveloping movement and nipped within the maw of the great pincer all the Ottoman forces in the coastal sector, the plain of Sharon, the hill region in the centre and along the western Jordan Valley. Meanwhile to the northeast the friendly Arab forces of the King of the Hedjaz have cut all railway communications in front of the fleeing Turks and are standing a barrier to their escape by way of the eastern plains. More than 18,000 Turks have been made prisoners by the British, and guns in excess of 120 had been counted when the last reports from General Allenby were received. In addition great quantities of war stores had been captured and still others had not been counted owing to the rapidity of the movement. It is not improbable that within the bag, strings of which have been drawn out, thousands of Turks are cowering. Many of those already made prisoners fleeing in disorder, literally walked into the hands of the British, knowing their line of retreat had been cut off. Although the Turks at some points offered considerable resistance to the British, at no point were they able to stay the advance on the famous field of Armageddon which the British cavalry swept across and occupied Nazareth to the north. In the operation of sewing the enemy within the sack, airman played an important role, vigorously bombing the retreating Turks and inflicting enormous casualties on them. The losses of General Allenby are described as slight in comparison with the importance of the movement carried out. In Macedonia the Italians have joined the fray with the British, Serbian and Greek troops, and are hard after the Bulgarians and their allies, who are being driven northward through southern Serbia. Between the Cerna and Vardar Rivers, the British and the Italians are sending up reinforcements, the British troops have continued their advance. The Serbians west of the Cerna River have crossed the Friesseth road at Kavadar, which constitutes an advance of more than miles into their once-held territory. The east of Monastir the famous Cerna bend and have taken several positions, while between the Cerna and the Vardar, the French also have with success.

WESTERN THEATRE, Sept. 19. Despite the vigorous resistance of enemy rearwards, the offensive between the Cerna and Vardar Rivers has progressed to-day. Allied forces have reached the region of Nisko. Serbian forces have gained a footing on the left bank of the Cerna in the region of Dunya. The Serbs have succeeded in accentuating progress in the direction of Konop, where they have traversed partly difficult ground on the range between the Belashnitsa River and the Bosna. French and Greek troops have taken the village of Tush of Drena. Because of difficulties of communication over the vast mountain covered in the operation, it is possible as yet to estimate the number of prisoners taken, but it is that 5,000 prisoners and 80 guns have been captured. The offensive of the Greeks and British in the Lake Doiran region which was marked by furious battles came to progress. Violent counterattacks have been made in vain against the British.

PARIS, Sept. 21. Their drive for the outflanking of the French last night

captured day's progress, but were driven back by the French. The French have captured a large number of prisoners and guns. The French have captured a large number of prisoners and guns.
