

NOTED HAWAIIAN IS LOUD IN PRAISE OF CALGARY

Mrs. Elizabeth Yates, Famous Writer, is Greatly Impressed With the Outward Appearance of the City and Character of the People Here

THINKS INDUSTRIAL BUILDING GOOD IDEA

Calgary, in Her Eyes, Is a City Beautiful With Fine Streets and Is Remarkably Clean; Rolling Ground Presents Opportunity for City Planning

Mrs. Katherine Yates, noted Hawaiian author, arrived in Calgary a few days ago, and found much to her surprise, what a finely situated city Calgary was and how blessedly bright, warm, sunny weather. Mrs. Yates declares that she has never been so struck with a city as in this one. Her growth, its youthful enthusiasm, and its boundless possibilities have all impressed themselves on her mind. She can only see for Calgary a very great future indeed.

Mrs. Yates gave the following interview to The Albertan yesterday:

"Calgary is the most astonishing city that I have ever visited. Because of what I knew of its phenomenal growth and therefore a sort of crude, unsustained, temporary superstructure, erected over what I had heard was an undoubtedly firm rock foundation. Hence my astonishment at finding, not flimsy, makeshift collections of cheap structures, but a city of really splendid buildings, business blocks, and residences of solid, permanent construction and of types of architecture of which to be proud. The strongest feeling of the newcomer is that of incredulity, that one city could by any possible means produce such a number of really beautiful buildings, each proclaiming its newness and its solidity, and the permanent interest back of it. That such rapid growth should show the characteristics of a mushroom, is what is so astonishing."

"One of the points which has struck me most forcibly is the excellence of the city streets. They are smooth and clean, miles and miles of them, and how the city has ever managed to keep them in the phenomenal growth of its expansion is a mystery to me. The roads in the outlying districts do not seem to be quite so good. The wide, straight streets would lead one to expect, considering that they must act as feeders to a very great district, but city fathers who have shown such wisdom in the planning of city affairs will not permit the condition of the highways to be as a difficulty in the path of those who are helping Calgary to do the astonishing things which she is going to do."

"Another thing which especially strikes me is the attention which is being given to the beauty of the city, and the wonderful possibilities which it offers in that direction. The rolling grassy country gives such an opportunity for effective landscaping, and this opportunity is being so well appreciated and utilized that the character of the city is being improved in a way which is a pleasure to the eye. The planting both there and in the lower lands, great admirably for the beauty of the Calgary of the near future. Still another thing which appeals to me is the excellence of the street car service, and the courtesy of its employees—conductors and drivers—who are doing their work with a large percentage of the comfort of a large portion of the inhabitants of any town."

"The magnitude and beauty of the new business blocks going up is about the best advertisement which Calgary could have, for they show to the world the confidence of those who know that the city has it in her to do, and their conviction that she is going to do it, and do it well."

"The magnitude of the building here, the question of erecting a building for the housing and furnishing of power and light to small industries, is a new idea to me, but appeals to me very strongly. There must be necessity, by many infant industries here, or likely to come here, which are not yet strong enough to stand on their own feet to the extent of erecting buildings and installing power, but which yet have within them the potentialities of becoming great and wealth-producing concerns. Those would thus be given a chance to try themselves out, prove themselves and get credit for infant industries, and erect a building to the city's credit. Any way, the building would be revenue producing, and the money under way, the sooner the revenue and growth of its progeny will begin. It would be like an exceedingly good thing."

Canadian by Birth.

As for me, I am a Canadian by birth, and duty proud thereof, and Honolulu is my home, Calgary and Honolulu are about as much alike as a champagne football player in the midst of the play, is like the prettiest and most fascinating, seventeen-year-old girl that you know, swinging lazily in a hammock under a tree. Hawaii is the most beautiful place in the world, and I would like to marry one particular false impression which is prevalent about it. It is not here, either in summer or winter—85 degrees being the very highest that the official thermometer indicates, and the climate is always a cool breeze blowing down from the mountains.

When you know how new here to Paradise a bit of the world can be to go to Vancouver and set sail for the islands, the condition of the highways to be as a difficulty in the path of those who are helping Calgary to do the astonishing things which she is going to do."

What the West Did Yesterday

In WINNIPEG:

The city is to have a motor bus service. Twenty cars will be running within three months.

In EDMONTON:

Seeding is practically finished in the older districts of Central Alberta; slight increase in acreage from 5 to 10 per cent, newer districts 10 to 20 per cent, proportion of 1 to 4 grains about as last year. Seed went in under excellent conditions, making rapid growth.

In LETHBRIDGE:

Seeding is practically completed in Southern Alberta. Director Fairchild, of the government experimental farm, states that 50 per cent is completed. The average under cultivation is reported the same as last year; it is estimated that about 70 per cent of the seeding is done. The rainfall as recorded for the four months this year is 3.6 inches, an increase of 1.88 for the same period last year.

In CALGARY:

A party of 125 British farmers arrived today to take up C. P. R. ready-made farms. Arrangements are completed for the location of a marmalade factory here. The celebrated town planner, Mr. Mawson, speaking at the Canadian Club, recommends two new bridges, reclamation of river embankments and islands, also construction of large floating lakes. It is stated that Calgary is already noted in other countries for the excellence of some of its domestic architecture.

be given a chance to try themselves out, prove themselves and get credit for infant industries, and erect a building to the city's credit. Any way, the building would be revenue producing, and the money under way, the sooner the revenue and growth of its progeny will begin. It would be like an exceedingly good thing."

CALGARY RAD FLOWERS PLANTED VICTORIA DAY

Amateurs Who are Successful Will Show Their Blooms and Fine Products at the Exhibition Which Gives Many Prizes for These.

OVER A HUNDRED CLASSES ARE OPEN

Season Opened Auspiciously and Argues Well for a Great Display of Blooms of Every Class in Calgary When the Time Comes Round

HUNDREDS of Calgary people who took advantage of yesterday last week to set out their flowers, are planting a fine variety of flowers which has been experienced since. If there was anyone who would not believe that there are not flower lovers a walk around the residential section last Saturday afternoon would have convinced them. Men and women and boys and girls in nearly every garden plot were busy setting out plants, every variety was being placed in the ground and the result will be noticeable in a few weeks when the blossoms develop and the fragrance of hundreds of plants is borne on the air.

The horticultural society has done a great deal to dispel the idea that it is difficult to grow flowers in this city. The result of their teaching can be witnessed in all parts of the city. There are now lawns and gardens everywhere, which are a credit to the city and would compare favorably with those of many of the larger cities and in many of Canada where the people think they have much better climatic conditions to assist them in their cultural pursuits. The most pleasing incident in connection with the growing in home decoration and beautification is the fact that every year there are more people who are being adorned by trees, shrubs, and flowers.

To a certain extent the Calgary exhibition is responsible for this, and W. J. Hutchins was appointed secretary of the committee. It was also agreed to have the mayor present at the first meeting, it is understood that they will not be ineligible for membership of the association and they will be invited to join in the morning and in the evening of the week half holiday in the summer months.

A committee was appointed to call a mass meeting to be held at the city hall, and W. J. Hutchins was appointed secretary of the committee. It was also agreed to have the mayor present at the first meeting, it is understood that they will not be ineligible for membership of the association and they will be invited to join in the morning and in the evening of the week half holiday in the summer months.

"SALADA"

The Highest Standard of Quality & Value, together with Absolute Purity are the Characteristics of this Famous TEA.

In Sealed Lead Packets Only. Black, Mixed and Green.

Mass Meeting to Arrange for Early Closing and Weekly Half Holiday

The latest organization in Calgary is the Retail Clerks' association, and its object the securing of hours for those who work in the stores of the city. A meeting was held in the Y.M.C.A. last evening at which there was a goodly attendance, and a committee was appointed to call a mass meeting of all clerks in the city for the purpose of embarking on a full organization.

G. L. Evans occupied the chair at the meeting, and there were various speakers, who called attention to the great need for better hours among those who work in the stores of the city. It was proposed that the clerks should organize a union with the Business Men's association with a view to getting shorter hours and having a weekly half holiday in the middle of the week. Those present were unanimous for that move.

A committee was appointed to call a mass meeting to be held at the city hall, and W. J. Hutchins was appointed secretary of the committee. It was also agreed to have the mayor present at the first meeting, it is understood that they will not be ineligible for membership of the association and they will be invited to join in the morning and in the evening of the week half holiday in the summer months.

A committee was appointed to call a mass meeting to be held at the city hall, and W. J. Hutchins was appointed secretary of the committee. It was also agreed to have the mayor present at the first meeting, it is understood that they will not be ineligible for membership of the association and they will be invited to join in the morning and in the evening of the week half holiday in the summer months.

The horticultural society has done a great deal to dispel the idea that it is difficult to grow flowers in this city. The result of their teaching can be witnessed in all parts of the city. There are now lawns and gardens everywhere, which are a credit to the city and would compare favorably with those of many of the larger cities and in many of Canada where the people think they have much better climatic conditions to assist them in their cultural pursuits. The most pleasing incident in connection with the growing in home decoration and beautification is the fact that every year there are more people who are being adorned by trees, shrubs, and flowers.

To a certain extent the Calgary exhibition is responsible for this, and W. J. Hutchins was appointed secretary of the committee. It was also agreed to have the mayor present at the first meeting, it is understood that they will not be ineligible for membership of the association and they will be invited to join in the morning and in the evening of the week half holiday in the summer months.
