Thirty Soldiers Drowned.

Paris, April 24.—A telegram from Hue,
the capital of Annam, says: On April 20 a
ship of the Messageries Maritimes foundered
in the River Claire, and the captain and 30
soldiers were drowned.

The Financial Feeling.

London, April 24.—There was no change
in discount rates during the past week and
nothing occurred to break the case of the
money market. English railway securities
were depressed last week and foreigners
were irregular.

The Tin Plate Business.

SWANSEA, April 24.—It is stated that
owing to the depression in the tin
plate trade, resulting from the
McKinty tariff, the proprietors of a
number of the largest plate factories in
Wales intend to erect works in America.

The Author of the "Marseillaise."

PARIS, April 24.—A statue of Rouget De
Lisle, who wrote the words and music of
the "Marseillaise" 100 years ago, was
unveiled today at Chisley le Roi. Ex-
Minister Goblet delivered an oration.
President Carnot was represented at the
ceremony.

Movements of Royalty.

LONDON, April 24.—The Prince of
Wales and his family joined the
Queen at Hyeres, France. All the royal
visitors will depart from that place on
Monday, the Queen going to Darmstadt,
and the Prince of Wales party returning
to London.

A Duel—Wounded in the Clothes.

TUNESLEY, April 24.—A duel between
two men took place yesterday afternoon at
Nieuport-Bains, a seaside resort near
Ostend. No damage was done except to
the clothing, that of Mr. Fox's being
pierced, but he escaped bodily hurt.

Two Murderers Beheaded.

BRISTOL, April 24.—A double execution
took place today at Gortitz. The con-
demned men were two workmen named
Kneil and Heydrich, who murdered a
widow named Buchert at Leopoldsdorf.
They were executed by guillotine, the head-
man, who has now beheaded 50 persons.

A Horrible Dead.

ST. PETERSBURG, April 24.—A horrible
death has been committed by one of the
chief masters of the private chapel in the
Imperial Palace at Peterhof. While in
decisions frenzy he murdered his wife,
after which he chopped her into fragments,
which he buried in a stove, and then threw
his three children into the river.

Sank in Seven Minutes.

LONDON, April 24.—The British steamer
Earl of Chester, bound from Cardiff for
Sables d'Olonne, was in collision during a
dense fog near Ilfracombe, Devonshire,
with the Spanish steamer Soto, presumably
from Hamburg for Barcelona. The Earl
of Chester had an immense hole stove in her
side and seven minutes after she was struck she
sank. Her crew took to their boats and
got clear of the steamer before she went
down. They afterwards were picked up
and landed at Penarth. The Earl of Chester
was an iron screw steamer of 953 net and
1,480 gross tons burden.

Tar Fires Saved the Grape Vines.

BERLIN, April 24.—The vineyards in
Alsace-Lorraine recently suffered the same
fiasco as the vineyards in France. From
mild weather the temperature suddenly
dropped to seven degrees below zero.
Enormous damage was done in the vicinity
of Strasbourg, but the vine growers in the
Rhineland district announced that great suc-
cess followed their burning of tar in the
vicinity of the vineyards. The fire caused
the temperature to rise and the result was
that all their vines and fruit trees were
saved.

Mary To Be Married.

LONDON, April 24.—The Manchester
Courier says that the betrothal of Prince
George, only son of the Prince of Wales,
and Princess Mary Victoria, daughter of
the Duke and Duchess of Teck, has been
definitely decided upon and that it will
shortly be announced. No surprise is
occasioned by the statement. It was re-
ported shortly after the death of the Duke
of Clarence and Avondale, the elder
brother of Prince George, to whom the
princess was engaged, that such a marriage
would be arranged. It is said that the
Queen, who is very fond of Princess Mary,
is heartily in favor of the betrothal, and
that in fact it was her influence that
brought it about. The marriage of the
Prince and princess would be greeted with
much satisfaction by the people with whom
both are extremely popular.

Schools of Crime.

LONDON, April 24.—A letter written by
Mr. Lester William Tallack, of the Howard
Association, has been published here and
the newspapers print lengthy comments on
the letter. Mr. Tallack says that after a
careful study of prisons in Italy and
America, where a system has been adopted
of giving prisoners of a hardened type
separate quarters with the other prisoners,
and providing them with comforts and luxuries,
he has found that the results are deplorable.
The prisoners of Massachusetts, he declares,
are schools of crime and have terrible
effects upon the community. Crime in

England, where the prisoners are separated,
has, according to Mr. Tallack, greatly
decreased, while in America it is rapidly
increasing.

Anarchist Demonstration in London.
LONDON, April 24.—The funeral of Mrs.
Mowbray, wife of the publisher of the
Commonwealth, the Anarchist paper which
was seized by the police a few days ago,
took place yesterday from Whitechapel.
The funeral was attended by an enormous
crowd of members of the International
Workingmen's Club. A procession with a
number of red flags and banners was
formed and accompanied the hearse for a
long distance. Two of the more con-
spicuous of these banners bore the words
"Remember Chicago." "There will be a
time when our silence will be more power-
ful than the voices you strangle to-day."
There was no disturbance.

The Silver Question.

LONDON, April 24.—A dispatch that has
been received here from the United States
stating that England had intimated her
readiness to join a conference to bring about
an enlarged use of silver has caused much
surprise in city circles. No belief is put
in that part of the report which states that
the basis of a conference was formulated
here. The Times says: A decided majority
of those competent to judge regard the
issue of notes based on silver with great
disfavor. The general sense of the com-
munity is steadily opposed to anything
that would tend to debase the currency.
The result of the employment of the American
Treasury as a pig silver warehouse has
not been so satisfactory as to encourage
imitation.

Awful Mortality.

CALCUTTA, April 24.—A very virulent
epidemic of cholera is raging in Benares.
The mortality is very great. Yesterday
there were reported 180 new cases and 153
deaths from the disease. Dr. Gregg, the
sanitary commissioner for Bengal, recently
issued a report upon an outbreak of cholera
that occurred at Sonapore, a few miles
northwest of this city. Over the whole of
the affected area he found that tanks of
various shapes, sizes and depths had been
dug and that all contained very dirty
water. Low, foul jungles reeking with
the surfaces of which were almost
completely hidden with thick decay-
ing water plants, with here and there a
clear place where the inhabitants wash
their cooking utensils and draw water for
domestic use. Between and around the
tanks, deep, uneven drains, in which filth
collected. These substances, under the
influence of the hot sun, quickly decompose
and emit foul odors. In places Dr. Gregg
actually observed "masses of undulating
magnets and portions of decaying ani-
mals." Wherever the people living in the
houses in the neighborhood of these tanks
drank the water, there cholera made its
appearance. The tanks are also the sources
from which the milkmen obtain water for
their cows, and it is more than probable
they dilute their milk with this same water.

A New Commander.

LONDON, April 25.—Col. Dole has been
appointed to the supreme command of the
French expedition in Dahomey. The Paris
correspondent of the Times comments upon
the supreme indifference of the French
Government in appointing to the command
an officer now in France, inasmuch as
Belgian troops are engaged in the most
critical combats before the end of a month.

The New Italian Rifle.

LONDON, April 25.—The Rome corre-
spondent of the Times says a great Ger-
man authority has assured him that the
new Italian rifle is the best yet introduced,
being superior to the Lebel, Mauser or
Mannlicher. He says that the Italian
army authorities, conscious of the fact, are
determined to go on manufacturing the
rifle whatever sacrifice be entailed—even
the abandonment of the African colony.

A Threatened Revolution.

KINROSS, Jamaica, April 25.—Steam-
ships arriving here within the past few
days from Havre report that rumors of im-
pending revolution are again rife in the
black republic. President Hippolyte is
said to be fully aware of the threaten-
ing state of affairs and firmly determined
to meet any attempt to stamp out the
first sparks of revolution that show themselves.
For a long time there has been talk of an
uprising among the Haytiens. It is said
now on the best authority that it will
shortly occur. Legitimate has lately come
into possession of a large amount of money
and will freely expend it to gratify his
ambition and satisfy his feelings of re-
venge. His agents are reported to be
actively engaged securing arms and ammu-
nition, enlisting men and fitting out a
war vessel.

A VALUABLE SAPPHIRE GROUND.

Eight Thousand Acres Sold for Two
Million Dollars.
HELENA, Mont., April 25.—Spart Bros',
sapphire ground near here has been sold to
the Sapphire and Ruby Company, of Mon-
tana, an English company, for \$2,000,000.
The land sold embraced 8,000 acres on both
sides of the Missouri River, stretching for
nearly fifteen miles along its banks.

AN ASPHYXIATED TRIO.

Two Women and a Man Killed by Gas
in New York.
NEW YORK, April 24.—A man and
woman, registered in John Vignale and
wife, of Washington, were found asphyxi-
ated yesterday morning in Park Row
Hotel. The woman was dead and the man
dying.

Mrs. De Fossion, a teacher of elocution
and mother of the late comedian, James
O'Brien, was found dead in her room yester-
day, asphyxiated by gas, which the police
believe to have been turned on with
suspicious intent.

THE FIRE RECORD.

NEW YORK, April 25.—A dairy of the
Chester Improvement Company at Barke-
ville, N. Y., was burned this morning, to-
gether with 150 cows or more. The plant
is valued at \$200,000. The value of the
building destroyed is reckoned at \$25,000.
SAN FRANCISCO, Cal., April 25.—Two
large barns were burned early this morning
and John Hand, a tenant, and sixteen
horses were burned to death.

POLITICAL MATTERS.

Mr. Laurier Would Not Compromise—
The Cahan Charges Unsustained
by Evidence.

MR. LAURIER STOOD FIRM.
OTTAWA, April 24.—It has come out that
friends of Sir Adolphe Caron approached
Senator Talbot with the object of getting
him to induce his Liberal friends in the
House of Commons to drop the Cahan
charges. They intimated that if this was
done nothing would be heard of the
charges against the prime minister. These representations
were repudiated by Mr. Laurier, who
at once repudiated any such arrangement
and declared that the Liberals would not
for one moment entertain any proposals
looking to the dropping of the Quebec pro-
secutions.

THE CAHAN CHARGES PERSISTENT.
HALIFAX, N. S., April 24.—The Commit-
tee on Privileges of the Nova Scotia House
of Assembly which has been hearing the
evidence in regard to the charges brought
by Mr. Cahan, against the late premier,
McDonald and McPherson, of Cape Breton
county, and Fraser, of Victoria, report
that a certain amount of evidence had been
given showing irregularity and dishonesty in
connection with the road expenditure in
those counties, but that none of the serious
